VIETNAM IT MARKET REPORT

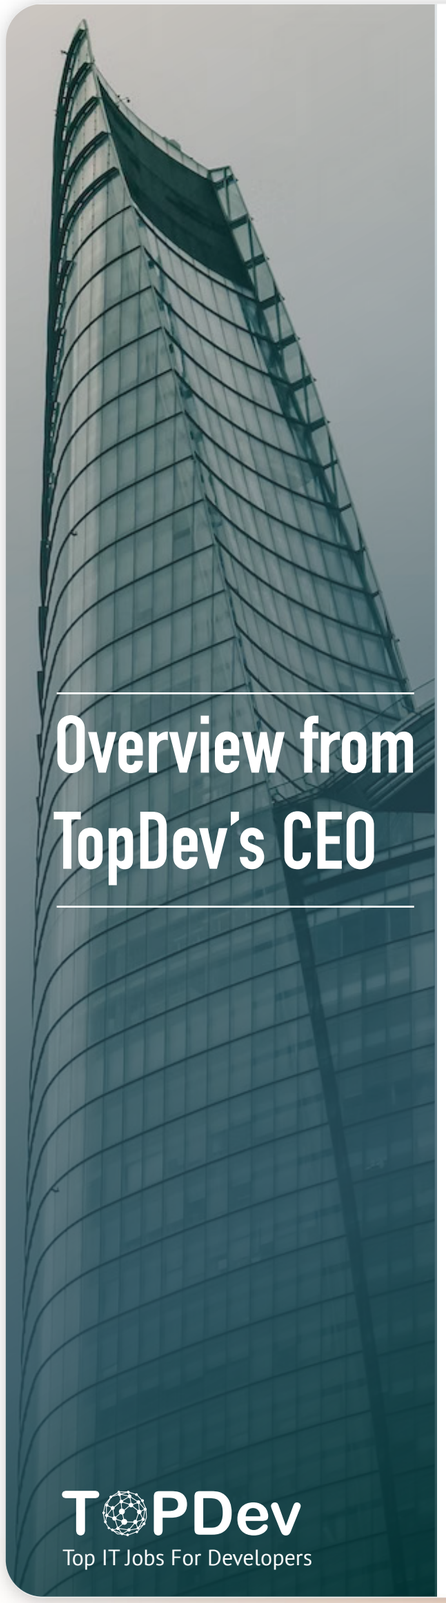

TECH HIRING 2022

Published by

TOPDev

Q3/2022

https://topdev.vn

Overview from TopDev's CEO

In the aftermath of unexpected COVID-19 over the past two years, our daily lives & work have been greatly shocked. Market uncertainties have also grown beyond measure. The labor market has been affected hugely in both negative & positive ways.

The big positive points are the quick transformation & adaptation of both employees & employers of deploying new hiring/ working models. In addition, the technical resources from the IT workforce and timely digital transformation acceleration policies have created a great foundation and resonance to maintain the economy & regain the recovery momentum rapidly in 2022.

However, there are new challenges forming in the labor market. While issues of working models/ methods, mental health concerns & work-life balance increasingly become hot topics for employees; employers are still struggling with business recovery & adapting to a completely new business landscape. This occurrence is especially more noticeable in the Tech industry where technology is the driving force behind these changes.

One thing is for sure, **Vietnam is having a promising IT human resource** in both quality and quantity as well as potential market & economic growth. This not only creates the advantage of **an ideal software outsourcing destination**, but also demonstrates the high-level feasibility of **creating abundant technological value with innovative domestic products**. The important thing is the strategic plans of investment, development & orientation for this human resource from all levels to promote national socio-economic goals in the context of globalization of talents and where especially Vietnamese IT human resources are internationally sought after. This poses many challenges for Vietnamese businesses to ensure the welfare regime as well as the innovation level of technology projects.

This is really a big subject & long route for all of us, but we believe that **CHANGE will make big things happen**. And to make changes, each party can participate in its own way: businesses to perceive changes and adapt with modern management policies, IT talents to have more profound concerns about the value of their development work, more support from intermediaries to facilitate. **All for talent-driven economic development**.

Park JongHo
CEO - TopDev

With a people-centric mind, we genuinely believe in people & help people be capable of making unlimited impact.

In the national context, the flexible responses together with constant efforts by the entire political system, from central to local, to recover and develop the economy, have helped bring the Covid-19 pandemic under control, with most of production and business operations returning to the normal state as before the Covid-19 pandemic. The socio-economic situation in the second quarter of 2022 in Viet Nam has prospered. Gross Domestic Product (GDP) in the second quarter of 2022 grew by an estimated 7.72 per cent over the same period last year, higher than the growth rate of the second quarters in the 2011-2021 period. Viet Nam's labor market in the second quarter of 2022 continued to maintain its recovery momentum. Both the total labor force and employed workers in the second quarter of 2022 increased relative to the previous quarter and over the same period last year in all three economic sectors.

LABOR FORCE PARTICIPATION RATE (%)

The labor force participation rate has declined significantly even in a period of good control of the epidemic in 2022. This has led to big challenges for economic recovery and acceleration of industrialization & modernization.

SOCIO-ECONOMICS

VIETNAM MINIMUM WAGES CHANGES

[unit: thoudsand dong]

Minimum wages to be increased by 6% from July 2022

The increase was announced in a government's decree Sunday, marking the first time since 2009 that the minimum wage increase takes effect in the middle of the year instead of the beginning of the year as has happened in previous years.

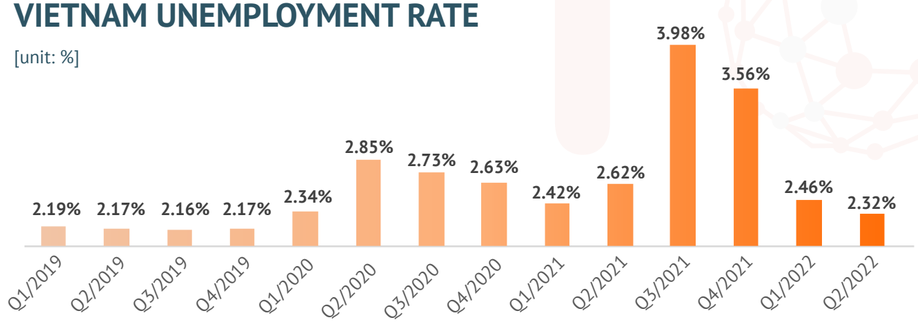

The increase in pay has been estimated at VND180,000-260,000 per month per worker, depending on four salary regions specified by the government.

It means the new minimum salary will range from VND3.25 million to VND4.68 million ($140.19-201.88) a month.

The policy applies to employees that are paid monthly and hourly.

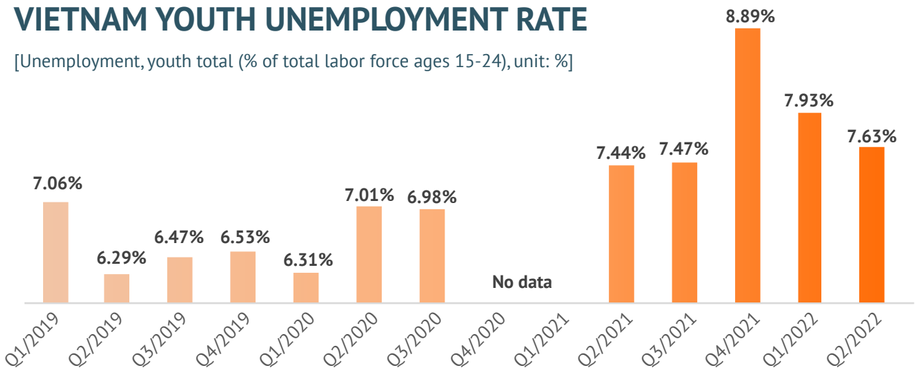

VIETNAM UNEMPLOYMENT RATE

[unit: %]

VIETNAM YOUTH UNEMPLOYMENT RATE

[Unemployment, youth total (% of total labor force ages 15-24), unit: %]

The youth unemployment rate (aged 15 to 24 years) decreased relative to the previous period afetr post-covid recovery effort.

The unemployment rate of working age in the second quarter of 2022 was 2.32%, down 0.14 percentage points compared to the previous quarter and down 0.30 percentage points over the same period last year. The unemployment rate of working age in the first 6 months of 2022 was 2.39%, down 0.13 percentage points over the same period last year. Generally for the first 6 months of 2022, the underemployment rate of working-age workers was 2.48%, down 0.1 percentage point over the same period last year. The underemployment rate in urban areas is lower than in rural areas (1.88% and 2.85%) respectively.

In the second quarter of 2022, the youth unemployment rate was 7.63%, down 0.30 percentage points compared to the previous quarter. The youth unemployment rate in urban areas was 9.13%, 2.30 percentage points higher than in rural areas. Compared to the previous quarter, this rate decreased in both urban and rural areas, by 0.17 percentage points and 0.37 percentage points, respectively. The youth unemployment rate in Ho Chi Minh City in the second quarter of 2022 was 11.15%, down 1.09 percentage points relative to the previous quarter, this rate in Ha Noi was 10.21%, up 0.84 percentage points.

NEWLY REGISTERED & RE-OPENED ENTERPRISES

116,900 *(6M/2022)* **+25.4%** COMPARED TO 6M/2021
AVERAGE MONTHLY, 19.5 THOUSAND
ENTERPRISES PARTICIPATING IN THE MARKET

159,953 *(2021)* **-11.9%** COMPARED TO 2020

This is the first time that the number of newly-established enterprises in the first six months has exceeded 70,000. Data from the Business Registration Management Agency under the Ministry of Planning and Investment showed that 116,900 enterprises were entering or re-entering the market in the first half of 2022.

The capital city of Hanoi and the southern largest economic hub of Ho Chi Minh City continued to record a significant increase in newly-established enterprises.

Meanwhile, the number of enterprises returning to operation in the first six months of this year was 40,667, an increase of 55% over the same period last year and 1.9 times higher than the average in 2017-2021.

CEASED ENTERPRISES (TEMPORARILY & DISSOLVED)

83,600 *(6M/2022)* **+19.0%** COMPARED TO 6M/2021
AVERAGE MONTHLY, 13.9 THOUSAND
ENTERPRISES WITHDRAW FROM THE MARKET

71,701 *(2021)* **+11.9%** COMPARED TO 2020

In the first 6 months of 2022, there were 83,570 enterprises withdrawing from the market, an increase of 19.0% over the same period in 2021 (lower than the 24.9% increase of the first 6 months of 2021 compared to the same period in 2020) in which, mainly enterprises temporarily ceased business (50,909 enterprises, accounting for 60.9%). The number of enterprises temporarily suspending operations pending dissolution and being dissolved tended to decrease compared to the same period last year.

SOCIO-ECONOMICS

EXPORT TURNOVER OF GOODS

$185.94B *(6M/2022)* **+17.3%** COMPARED TO 6M/2021

$336.25B *(2021)* **+19.4%** COMPARED TO 2020

IMPORT TURNOVER OF GOODS

$185.23B *(6M/2022)* **+15.5%** COMPARED TO 6M/2021

$332.25B *(2021)* **+26.5%** COMPARED TO 2020

TOTAL IMPORT & EXPORT TURNOVER OF GOODS

$371.17B *(6M/2022)* **+9.46%** COMPARED TO 6M/2021

$668.5B *(2021)* **+22.9%** COMPARED TO 2020

TRADE SURPLUS

$0.71B *(6M/2022)*

$4.0B *(2021)*

THE SAME PERIOD LAST YEAR HAD A TRADE DEFICIT OF $1.86B USD

Socio-economic in the first half of the year continued to show many good signs of recovery, in which the country's exports still maintained a double-digit growth rate, helping the trade balance maintain a trade surplus.
Exports in the first half of 2022 showed clear signs of recovery when key commodity groups maintained high momentum, and the export scale was also increased after the number of billion-dollar export items increased in contribution rate. for the economy.
Thus, in June 2022, the country's trade balance was estimated to have a trade surplus of 276 million USD. Generally in the first 6 months of 2022, the trade balance of goods is estimated to have a trade surplus of 710 million USD (the same period last year, the trade deficit is 1.86 billion USD).

FOREIGN DIRECT INVESTMENT (REGISTERED)

$14.03B *(6M/2022)* **-8.1%** COMPARED TO 6M/2021

$31.15B *(2021)* **+9.2%** COMPARED TO 2020

FOREIGN DIRECT INVESTMENT (IMPLEMENTED)

$10.06B *(6M/2022)* **+8.8%** COMPARED TO 6M/2021

$19.74B *(2021)* **-1.3%** COMPARED TO 2020

NEWLY LICENSED PROJECTS

752 *(6M/2022)*

2,523 *(2021)*

While COVID-19 has been the headline since late 2019, other recent profound economic shifts still warrant mention and consideration. Vietnam has become the destination of multiple supply chain and manufacturing relocations, due to strong economic fundamentals and a favourable investment environment when compared with neighbouring markets. Vietnam still recorded a total new, adjusted capital and share purchases by foreign investors reached $31.15 billion as of December 20 2021, up 9.2% annually. As of June 20, 2022, the total newly registered capital, adjusted and contributed capital to buy shares and buy contributed capital of foreign investors reached over $14.03 billion, equivalent to 91.1% over the same period in 2021.

Revenues of the information and communications technology (ICT) sector reached approximately 77 billion USD, rising 17% compared to the same period last year. Profit was estimated at 5.9 billion USD, up 13%, according to the report released on July 18. This year, the ministry set a revenue target of around 140 billion USD for the ICT sector, a year-on-year increase of 14%.

Regarding the IT landscape, around 3,400 digital technology enterprises were established in the first half (H1) of this year, according to the ministry.

The figure helps make the ministry's target of having 70,000 firms working in this sector in 2022 possible following a sharp rise over the years. In 2021 there were 64,000 firms working in the sector, up from 58,000 in 2020, and 45,600 in 2019.

INTERNET ECONOMY GROWTH RATE

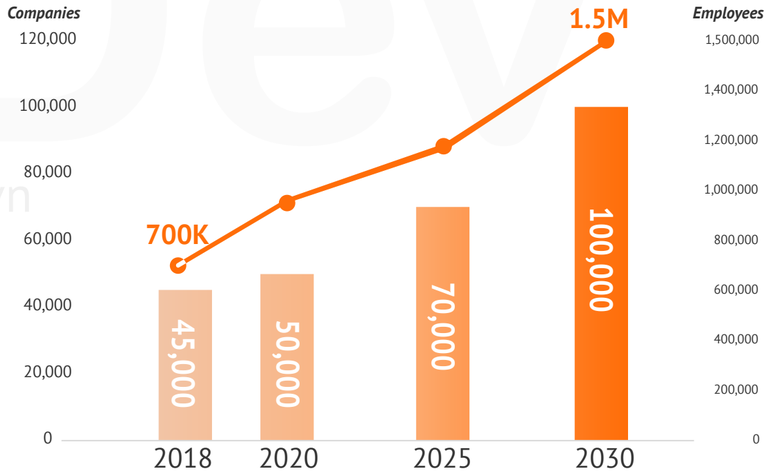

31% *(2021)* **17%** *(2020)* The highest Southeast Asia
Average annually growth rate to 2025 **29%**

INTERNET ECONOMY VALUE

$21B *(2021)* → **$57B** *(2025 - E)*

According to the "e-Conomy SEA 2021" report published by Google, Bain & Company from the US, and Temasek from Singapore, Vietnam's internet economy was worth $21 billion in 2021 and contributed more than 5% of GDP, or 7x higher than in 2015, and is expected to reach $57 billion in 2025, ranking it second in Southeast Asia. Growth in 2021 was 31 per cent, the highest in ASEAN, and will average 29% annually to 2025.

DIGITAL TECHNOLOGY COMPANIES BY 2030

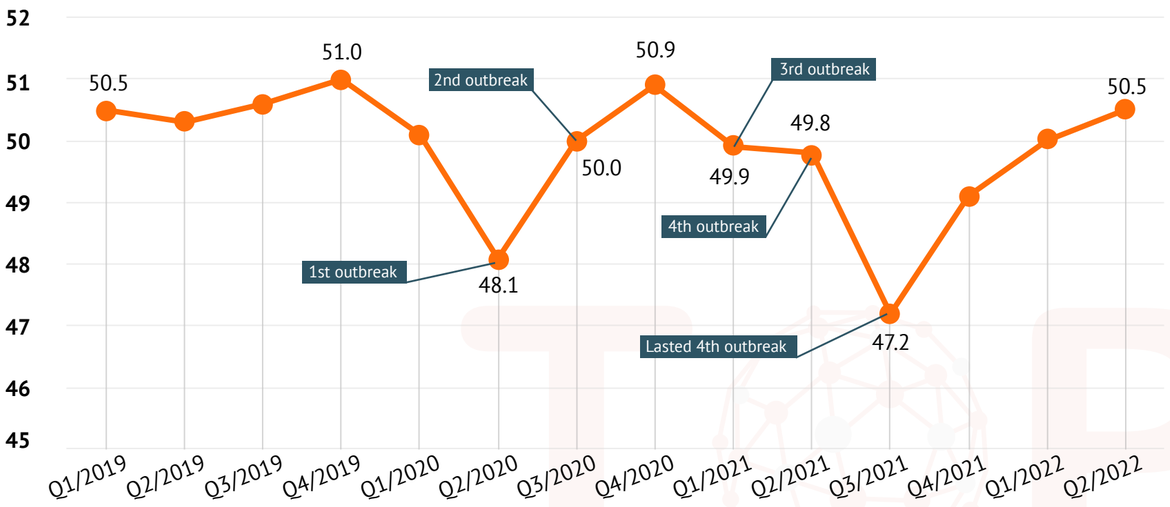

According to the President of VINASA Nguyen Van Khoa, the goal of the Vietnam Government is that by 2025 the digital economy will account for 20% of GDP and the proportion of the digital economy in each industry or field will reach at least 10%, and by 2030, the digital economy will account for 30% of GDP and the proportion of the digital economy in each industry or field will reach at least 20%, all of which are quite challenging, especially for traditional industries.

https://topdev.vn

VIETNAM & COVID-19 SITUATION | WORKPLACE SHIFT

EMPLOYED LABOR FORCE QUARTERLY 2019 - 2022

[unit: million people]

In 2021, with the serious impact of the epidemics, especially the epidemic that lasted in the 2nd and 3rd quarters, it had a direct impact on the labor force when it saw the number of employed workers decrease to only 47.2. million people (decreased to more than 3 million people compared to the beginning of 2019). With the policy of safe and flexible adaptation to the covid epidemic, from the fourth quarter of 2021, each economic sector has begun to recover and enter a rapid growth momentum in the first two quarters of 2022.

Viet Nam's labour market in the second quarter of 2022 has prospered. The number of workers negatively affected by the Covid-19 pandemic has decreased sharply, the number of people entering the labor force continued to increase, and the number of employed workers has increased sharply, especially in the services sector. Labour market growth has become more sustainable with the increase concentrated mainly in formally employed workers. Unemployment and underemployment both fell. Workers' income continued to improve.

However, with the significant impact and change in employment and labor patterns, **the former traditional work model has changed forever.**

Even since 2020, businesses in Vietnam had to allow their staff to work from home to prevent the spread of COVID-19. Hybrid models offer an ideal mix of office and remote working and this has been especially welcomed by employees. Although from some surveys, workers seem to adapt to the new form of work and have positive experiences, employers still prefer employees coming to the office. Besides, many employees, however, want to return to the office because they do not want to stay at home the whole time. Some do not have an appropriate workspace at home and miss their colleagues.

New challenges are coming.

1. There is uncertainty over how different work styles might impact **inclusion and engagement**: micromanaging behaviours have increased with hybrid & remote working, lack of trust from managers about their employees' productivity has become big concerns recently.
2. **Technology** will remain critical to enabling a future with increasingly diverse and distributed workforces
3. **Cybersecurity** is critical for making hybrid working safe
4. Identify the **role of the office** in the trending hybrid work model
5. New managerial methodologies, systems & policies as well as working processes

Thus, businesses will need to adapt and cater to varied preferences while supporting employees. The pandemic has forced businesses to rethink efficient strategies for hybrid work for the foreseeable future. This has meant the establishment of new workflows that mitigate staff travel while also ensuring that work timelines are met. Businesses will have to come up with an efficient workplace strategy regardless of where their employees are.

By 2030, Generation Z will account for more than one-third of the labor force. Generation Z is the first generation of digital natives. They expect a seamless connection between the physical and the digital, which is also what allows hybrid working to flourish.

2 DEVELOPER PERSONAS: CHANGES & TRENDS

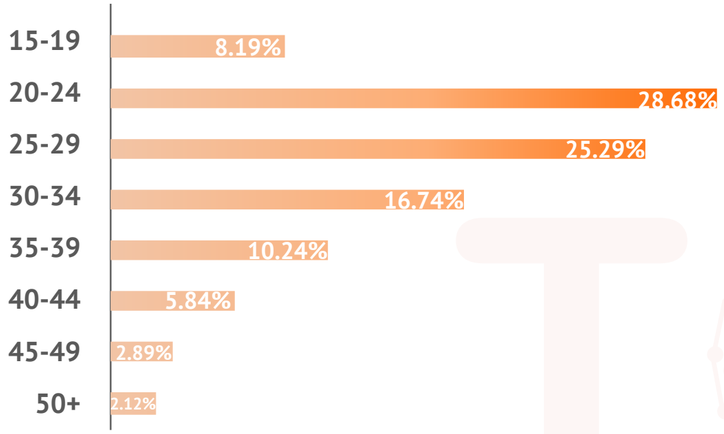

Vietnam Developers' demographic, interests & behaviors insights in daily life & workplace

TOPDev
Top IT Jobs For Developers

DEVELOPER DEMOGRAPHICS | PERSONAS

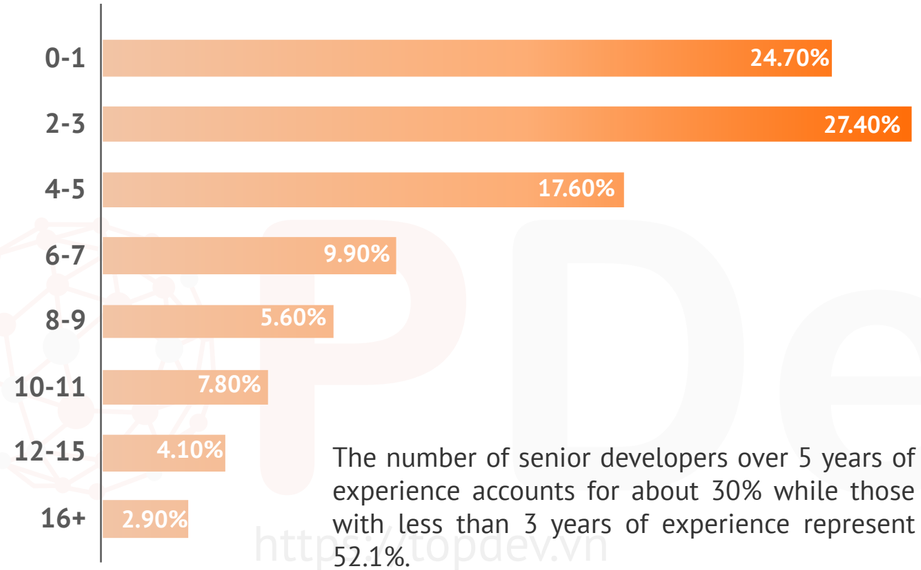

Nowadays, most of the developers belong to the GenZ & Millennials generation - employers need to pay attention to age, interests and insights to adjust their hiring plan to suit the current multi-generational recruitment trends nowadays. These generations desires a better balance, a healthy lifestyle, more information about the company, its products and wants to be highly involved in the product development process. They also expect the product to have the ability to serve them and their community.

<AGE/>

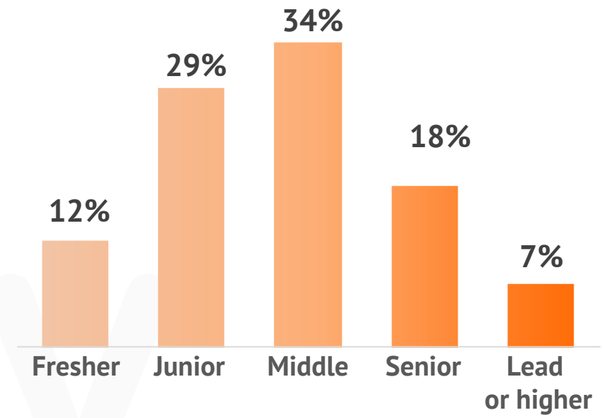

The age dominating this survey is from 20 to 34 years old. Numerous developers started coding early and about 8.19% of them started coding before 20. At present, the number of developers in Vietnam at a young age accounts for the majority with 53.97% aged 20 - 29 years old.

<YEARS OF EXPERIENCE/>

The number of senior developers over 5 years of experience accounts for about 30% while those with less than 3 years of experience represent 52.1%.

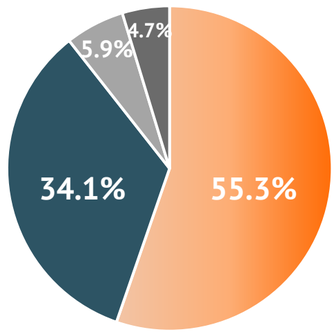

<LEVEL OF QUALIFICATION/>

More than 40% of developers are from fresher to junior level, followed by 34% of middle developers. Senior developers only account for nearly 20% of total IT personnels while that of leader & higher level is just 7%.

<LOCATION/>

Nearly 90% of developers are locating in 2 biggest cities of Vietnam: Ho Chi Minh 55.3% & Ha Noi 34.1%.

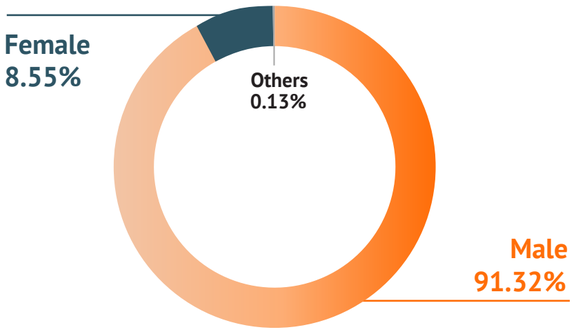

- Ho Chi Minh City
- Ha Noi
- Da Nang
- Others

<GENDER/>

Male still dominates the gender of developers or people working in the technology sector with 91.32%. Females constitute a minor number of 8.55%, however, the proportion of women has also increased gradually since we first recorded only 5% in 2017.

Recently, more & more opportunities have opened for females to start their career as developer coming from the STEM education programs as well as social & technological encouragement.

DEVELOPER DEMOGRAPHICS | TECH STACK

React, Java, MySQL, Spring Boot, Laravel, .NET Core, Django and AWS are the most popular technologies in their respective tech stacks.

Javascript

1. React	32.20%
2. Node.js	32.17%
3. Angular	27.08%
4. Vue	16.26%
5. Typescript	10.82%

Java

1. Spring Boot	45.92%
2. Spring	43.37%
3. Hibernate	14.03%
4. Struts	11.17%
5. Vaadin	3.87%

.NET/ C#

1. .NET Core	46.93%
2. .NET Framework	43.62%
2. ASP.NET Core	28.15%
4. ASP.NET MVC	24.02%
5. Xamarin	6.31%

PHP

1. Laravel	67.32%
2. CodeIgniter	34.17%
3. Symfony	29.32%
4. CakePHP	11.82%
5. Yii	5.98%

Database technologies

1. MySQL	58.12%
2. SQL Server	19.65%
3. MongoDB	18.79%
4. PostgreSQL	13.26%
5. Redis	10.78%

DevOps

1. Linux	75.32%
2. Docker	41.32%
3. Bash	11.20%
4. Kubernetes	10.89%

Python

1. Django	38.21%
2. Falcon	22.16%
3. Pyramid	16.50%
4. Flask	12.40%
5. Numpy	5.03%

Mobile Development

1. Java	49.06%
2. Swift	38.13%
3. Objective-C	35.20%
4. Flutter	26.11%
5. React Native	18.36%

Cloud Platform

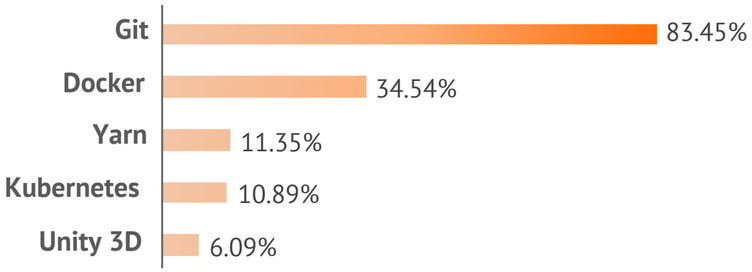

1. AWS	35.16%
2. Microsoft Azure	22.02%
3. VMWare	20.18%
4. Firebase	17.42%
5. Google Cloud	9.52%

JavaScript is the most popular language together with other IT skills. In which, React, Nodejs & Angular are the top 3 choices of Javascript frameworks. Top choice to work with Java is Spring Boot & Spring then Hibernate & Struts respectively. There hasn't been much change in .NET/C# list in which .NET Framework, .NET Core & ASP.NET Core top the list. Laravel remains the most popular framework in the PHP tech stack with more than 67%, followed by CodeIgniter (34.17%), Symfony (29.32%). MySQL keeps leading the SQL tech stack with more than 58%. However, the level popularity among SQL systems doesn't vary that much while Top 5 (MySQL, SQL Server, PostgreSQL, MongoDB & Redis) contribute respectively the same importance of database functions in every development. Python - one of the hottest 'player' recently in technologies world - shows a significant gap in popularity among choices, in which Django framework choice accounts for 38.21% while the 5th rank (Numpy) just share 5.03%. Among Mobile Developers, Java, Swift & Objective-C take the places on top 3 list of programming languages choice. Meanwhile, new "players" - React Native and Flutter have experienced dramatic increase in popularity in recent years. In choice of Cloud platforms, the biggest player AWS takes the 1st rank with 35.16%, followed by Microsoft Azure, VMWare, Firebase & Google Cloud.

DEVELOPER DEMOGRAPHICS | TECHNOLOGY & INTEREST

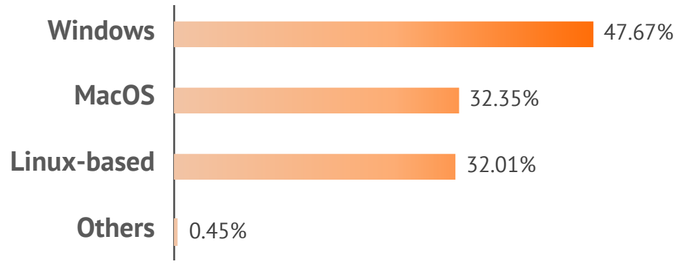

<TOOLS/>

Which tools do you usually use for daily work? (both using & want to use in the future)

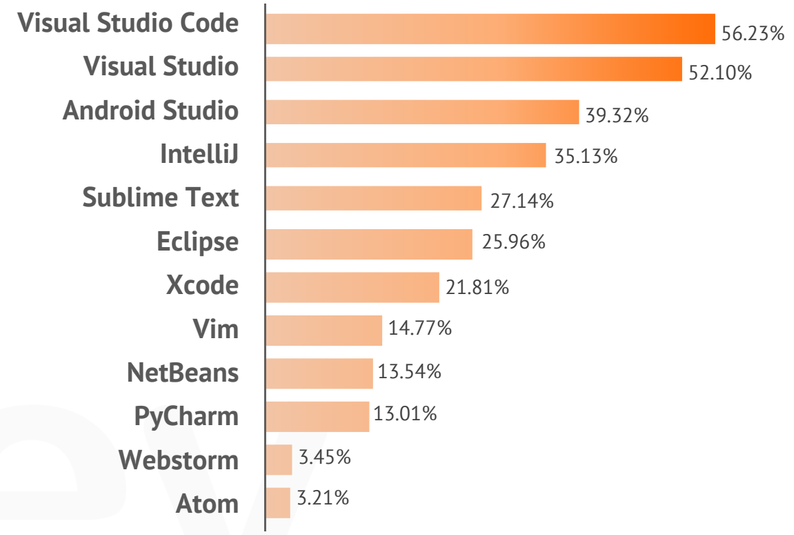

<OPERATING SYSTEM/>

What is the primary operating system in which you work?

<INTEGRATED DEVELOPMENT ENVIRONMENT/>

Which development environments do you use regularly for daily work?

Git & Docker are 2 most common tools in daily work of any developers. Windows remains as the most popular operating system followed by MacOS 32.35% and Linux 32.01%. Top 3 IDE are Visual Studio Code, Visual Studio & Android Studio.

<OTHER WORKING TOOLS/>

Which tools do you usually use for daily work? (communication, task management, online workplace...)

Jira · Confluence · Trello · Notion · slack · zoom · Microsoft Teams · Telegram · Airtable · asana · ClickUp

DEVELOPER BEHAVIORS | EMPLOYMENT & WORKPLACE

<EMPLOYMENT STATUS/>

Which current employment status are you?

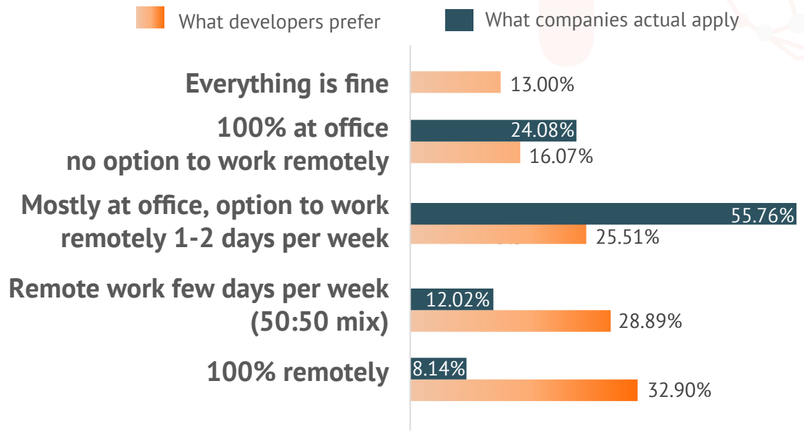

Only 7 / 10 developers are taking part in official labor force.

Nearly 75% developers are employed with a full-time jobs, which is lower than that number before 2021. It is not because of unemployment but from the rising trend of working remotely/ freelancing with more opportunities from developed countries.

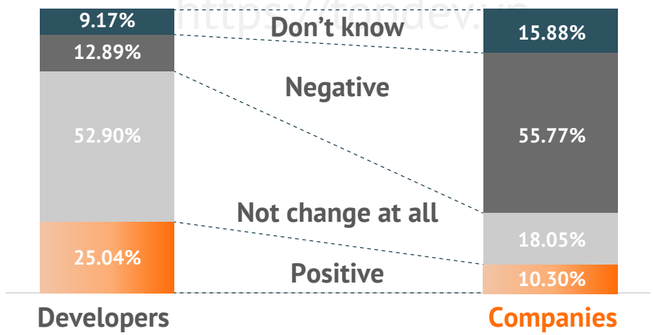

<WORKING METHOD/>

Which working method do you prefer?

<HYBRID WORKING/>

How do you feel about hybrid-working organization related to work performance/ productivity?

After 2 years living & working with Covid-19, the traditional work has changed a lot. A new form of working has appeared - hybrid working. Hybrid work is a flexible work model that supports a blend of in-office, remote, and on-the-go workers. It offers employees the autonomy to choose to work wherever and however they are most productive.
Hybrid working will be part of future work patterns, but some companies and employees are struggling to adapt to find the better way of management & engagement.

<WHAT GREAT DEVELOPERS HAVE/>

Which abilities/ characteristics do you think will make great developers?

"GOOD" DEVELOPER

1. Correctly structured and well-commented code
2. Demonstrate a solid knowledge of development technologies
3. Require a market price or slightly above
4. Actively use development methods
5. **Be serious about the work / provide & provide an excellent result**

"GREAT" DEVELOPER, above & plus:

1. The Visionary: great intuition, designing development solutions that provide excellent functionality and user experience while allowing for simple and easy debugging.
2. The A+ Team Player: great communication skill, high responsibilities, self-learning capibility, high-end user focus, balance between solution-based & problem-based approach

<WHAT DEVELOPERS LOVE TO HATE?/>

What won't be changed of being developers?

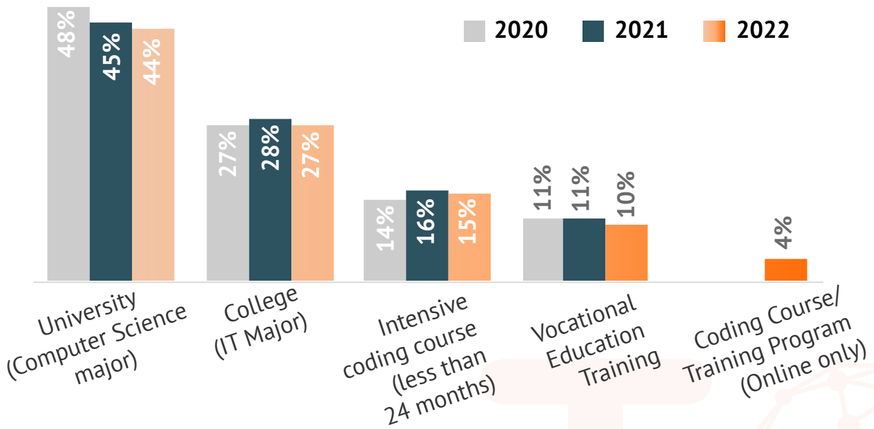

WELL, WE ARE DEVELOPERS!

1. Listen to "Just one more thing"
2. Poor QA
3. Interruptions ("Leave me alone, I'm coding!')
4. "Everything is top priority."
5. Meetings
6. Others' bad code
7. Endless documentation
8. Technology churn
9. Stereotypes
10. Endless requests for tech support

DEVELOPER BEHAVIORS | LEARNING

<START CAREER AS DEVELOPER/>

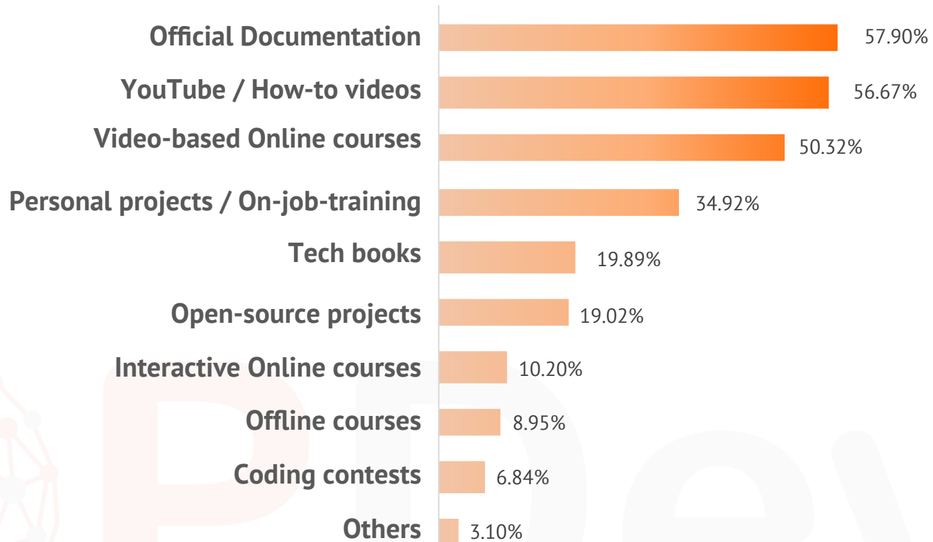

How did developers start to learn coding?

We do a survey of developers about where they start with learning to code. Top 2 in the list are the formal training systems in Information Technology at Universities (44%) and Colleges (27%). Due to Covid-19 impact, there has been a new source for learning to code: online-only coding courses.

<NEW TECHNOLOGY APPROACH/>

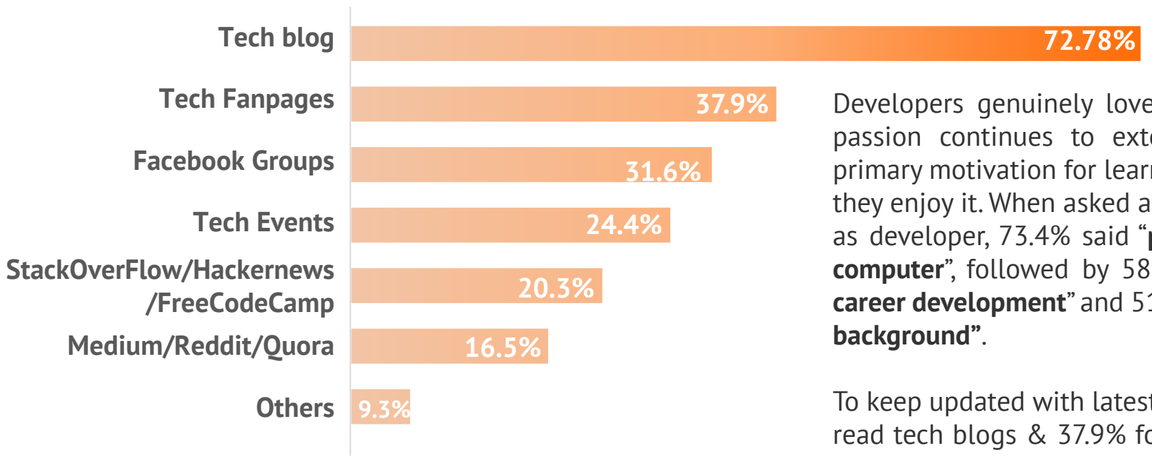

How have developers learnt new programming language/ technology?

Nearly 60% of the responses mentioned official documentation as well as Youtube sources. 50.32% of developers learn through video-base online courses. Followed by personal projects (34.92%). Personal projects are also a good way for developers to have environments of experiment, diversify approaches, update new technologies, create their own products and make the highlight on their working experience profile. Some other popular resources for learning programming include: Tech books, open-source projects, interactive online courses (new), offline courses and coding contests.

<TECH NEWS UPDATE/>

How have developers updated tech news?

Developers genuinely love & appreciate what they do—and this passion continues to extend. 62.5% of respondents said their primary motivation for learning a new technology is simply because they enjoy it. When asked about what attracted them to start career as developer, 73.4% said "**passion for technology, programming & computer**", followed by 58.9% of "**Attractive salary & prospective career development**" and 51.3% of having "**Good logical & computer background**".

To keep updated with latest tech trends & news, 72.78% developers read tech blogs & 37.9% follow tech fanpages. Facebook groups & tech events are also top main sources of them.

<ONLINE COURSE PLATFORMS/>

Which platforms do developers often use for learning new technologies?

udemy
coursera
codecademy
PLURALSIGHT
UDACITY
freeCodeCamp

Top courses to learn in 2021-2022

Full-stack Development | DevOps | Software Design & Architecture | Cloud AWS | Google Cloud | Data Analytics | Data Visualization | Python For Everybody | Database Management

VIETNAM DEVELOPERS RANKING

DEVELOPERS/ IT ENGINEERS IN SOFTWARE INDUSTRY
480,000

IT STUDENTS GRADUATE ANNUALLY (SOFTWARE MAJOR)
57,000

(*) Based on 2019 report from MOET with estimated growth rate in annual general universities/ colleges enrollment quotas.

IT PERSONNELS DEMAND IN VIETNAM 2018 - 2024 (SOFTWARE INDUSTRY ONLY)

The shortage of IT personnel is always the most difficult problem for the IT market. Although the salary and bonuses have been increasing remarkably for this industry, it is predicted that from 2022 - 2024, Vietnam will still have a shortage of 150,000 to 195,000 developers/engineers annually.

This shortfall comes from the disparity between developers' qualifications and business requirements. Notably now only 35% out of a total of 57,000 students majoring in Information Technology meet business requirements.

The gap is expected to still high until 2024 when the demand reaches 800,000 developers. To solve this issue, there should have strong collaboration & strategic partnership among government, educational institutions & businesses.

HUNDRED-YEAR PUSH FOR THE COUNTRY, FOR THE DIGITAL ECONOMY.

2021 was a memorable year for the ICT industry of Vietnam as digital transformation took place in all fields, and technology became one of the pillars of the fight against Covid-19, for Vietnam's economic recovery and development. With a new way of thinking and approach, in 2021, the whole information and communication industry recorded many positive results, despite the impacts of Covid-19. The ranking indexes in many fields of the information and communication industry were highly appreciated by international organizations. Revenue reached VND 33.4 quadrillion, up 9% over 2020.
Minister Nguyen Manh Hung often said: "Covid-19 is a hundred-year push". In fact, in 2021 Covid -19 was the push for digital transformation to spread to all aspects of economic, political and social life.
The ministry set the target of an information technology, electronics and telecommunications industry with the new mission of shifting from outsourcing and assembly to "**Make in Vietnam**", which means making products in Vietnam, mastering and creating technology. In which, the proportion of "Make in Vietnam" by 2025 would reach over 45%.

Top IT Jobs For Developers

TECH HIRING TARGET IN 2022

TECH HIRING TARGET IN 2022

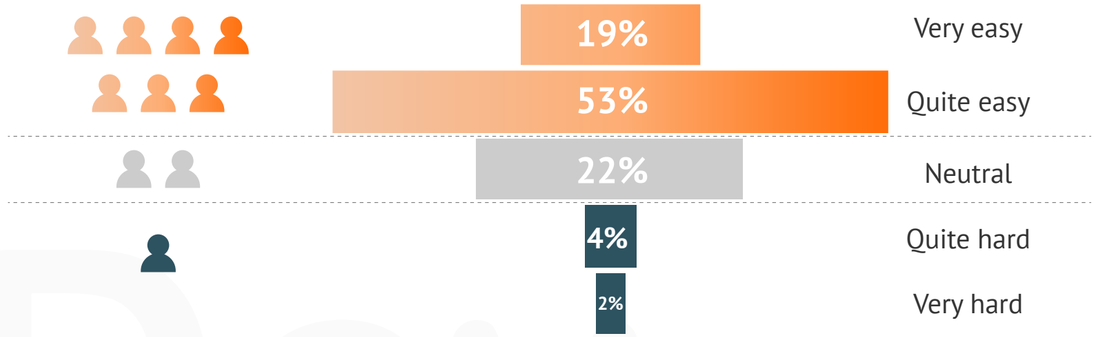

Question: How many developers planned to hire in 2022/2023?

With this number, it is estimated that the IT labor market in 2022 will have 153,636 IT vacancies, up 32.4% compared to 2021.

HOW CONFIDENCE OF DEVELOPER WHEN FINDING A JOB?

Question: On a scale of 0 - very hard to 5 - very easy, how do you think you can change jobs as a developer?

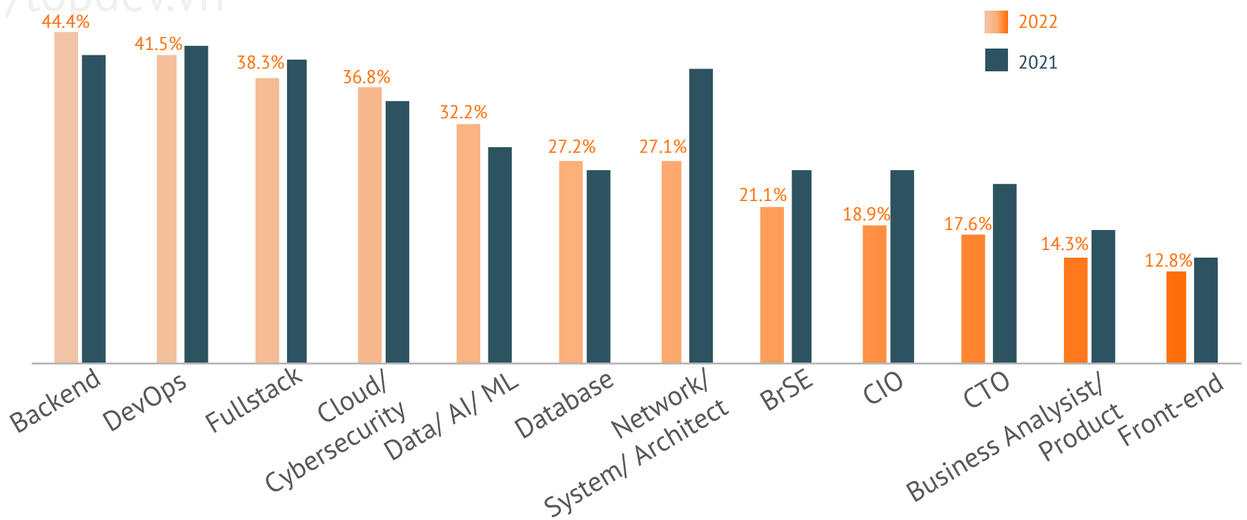

The figure shows that most developers (72%) feel that it is easy for them to change to a new job in the IT industry. While less than 6% developers feel a lack of confidence when changing jobs.

IT POSITIONS HARD TO RECRUIT/ FILL IN 2022/2023

Question: Choose top 5 positions you think that it's hard to find suitable candidates

We asked the above question to HR professionals with IT recruitment experience. Most of the answers mentioned 3 positions: Back-end developer, DevOps & Full-stack developer, in which they said it has been hard to fill all the vacancies of full-stack & back-end, while finding DevOps engineer is unreachable.

Following the top 3 list: Cloud/ Cybersecurity, Data/AI/ML, Database, Network/ System, BrSE.

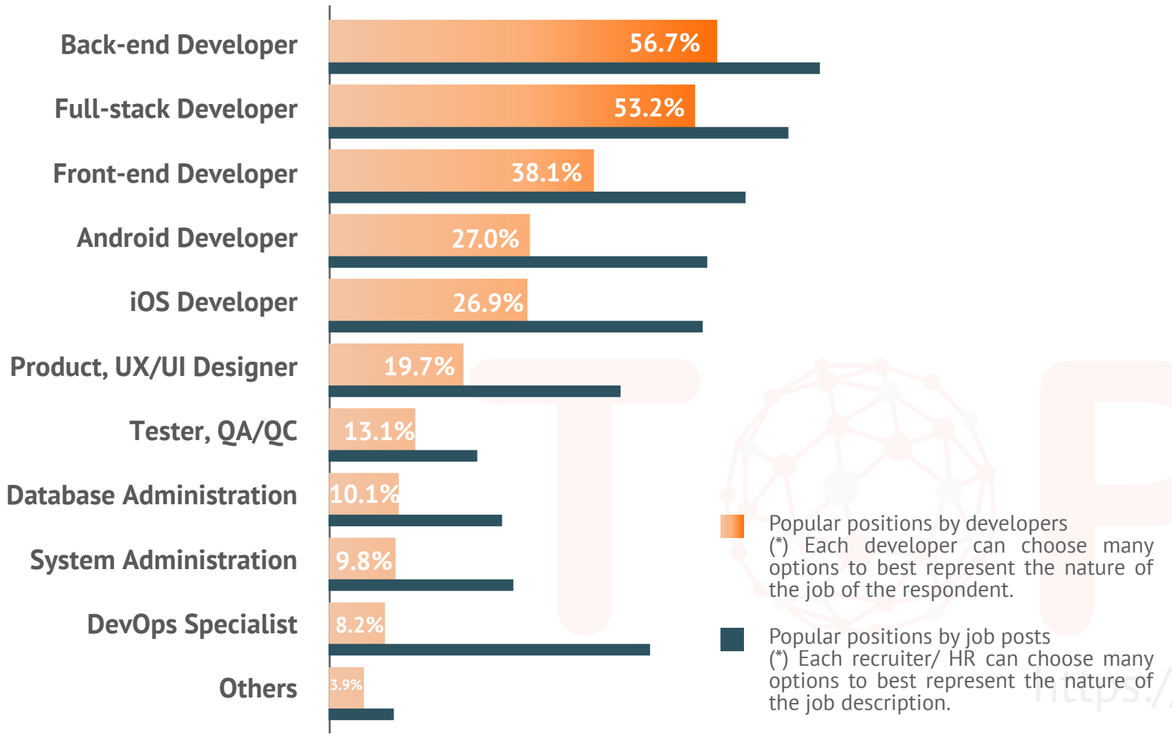

https://topdev.vn

TOPDev
Top IT Jobs For Developers

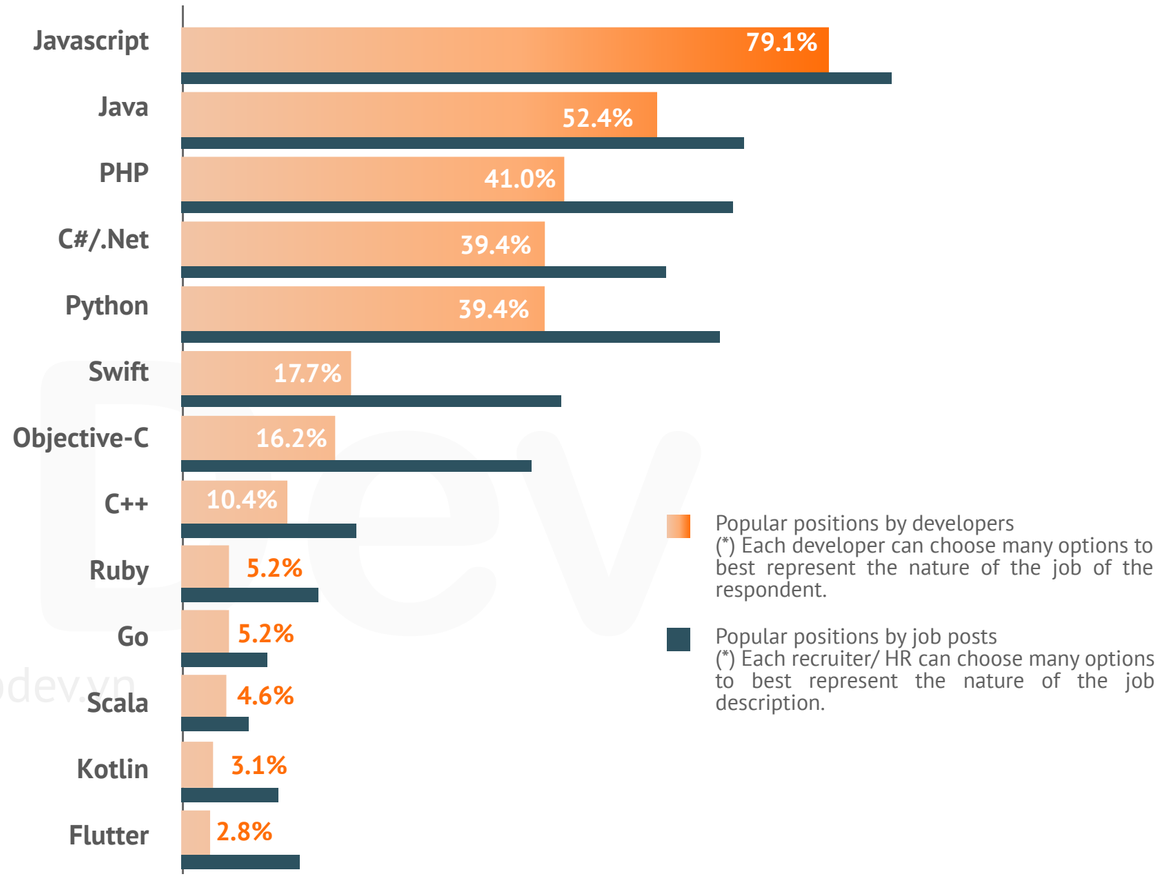

DEMAND FOR IT JOBS & TECH STACK

THE MOST POPULAR VS ON-DEMAND IT JOBS?

56.7% are Back-end developers, Full-stack Developers ranked 2nd with 53.2%. The dominance of trending web technologies has pushed the number of Web Developers much higher. Meanwhile, demands on these positions have experienced some significant switch when HR really focuses more on Full-stack & Mobile Developers as well as Product & especially DevOps Specialist.

THE MOST POPULAR VS ON-DEMAND TECH STACKS?

Despite some changes to the overall popularity of specific tech stacks in Vietnam & region, top 5 IT skills which companies are looking for have remained similar to previous years: Javascript, Java, PHP, C#/.Net & Python. Nearly 80% of companies are looking for JavaScript developers.

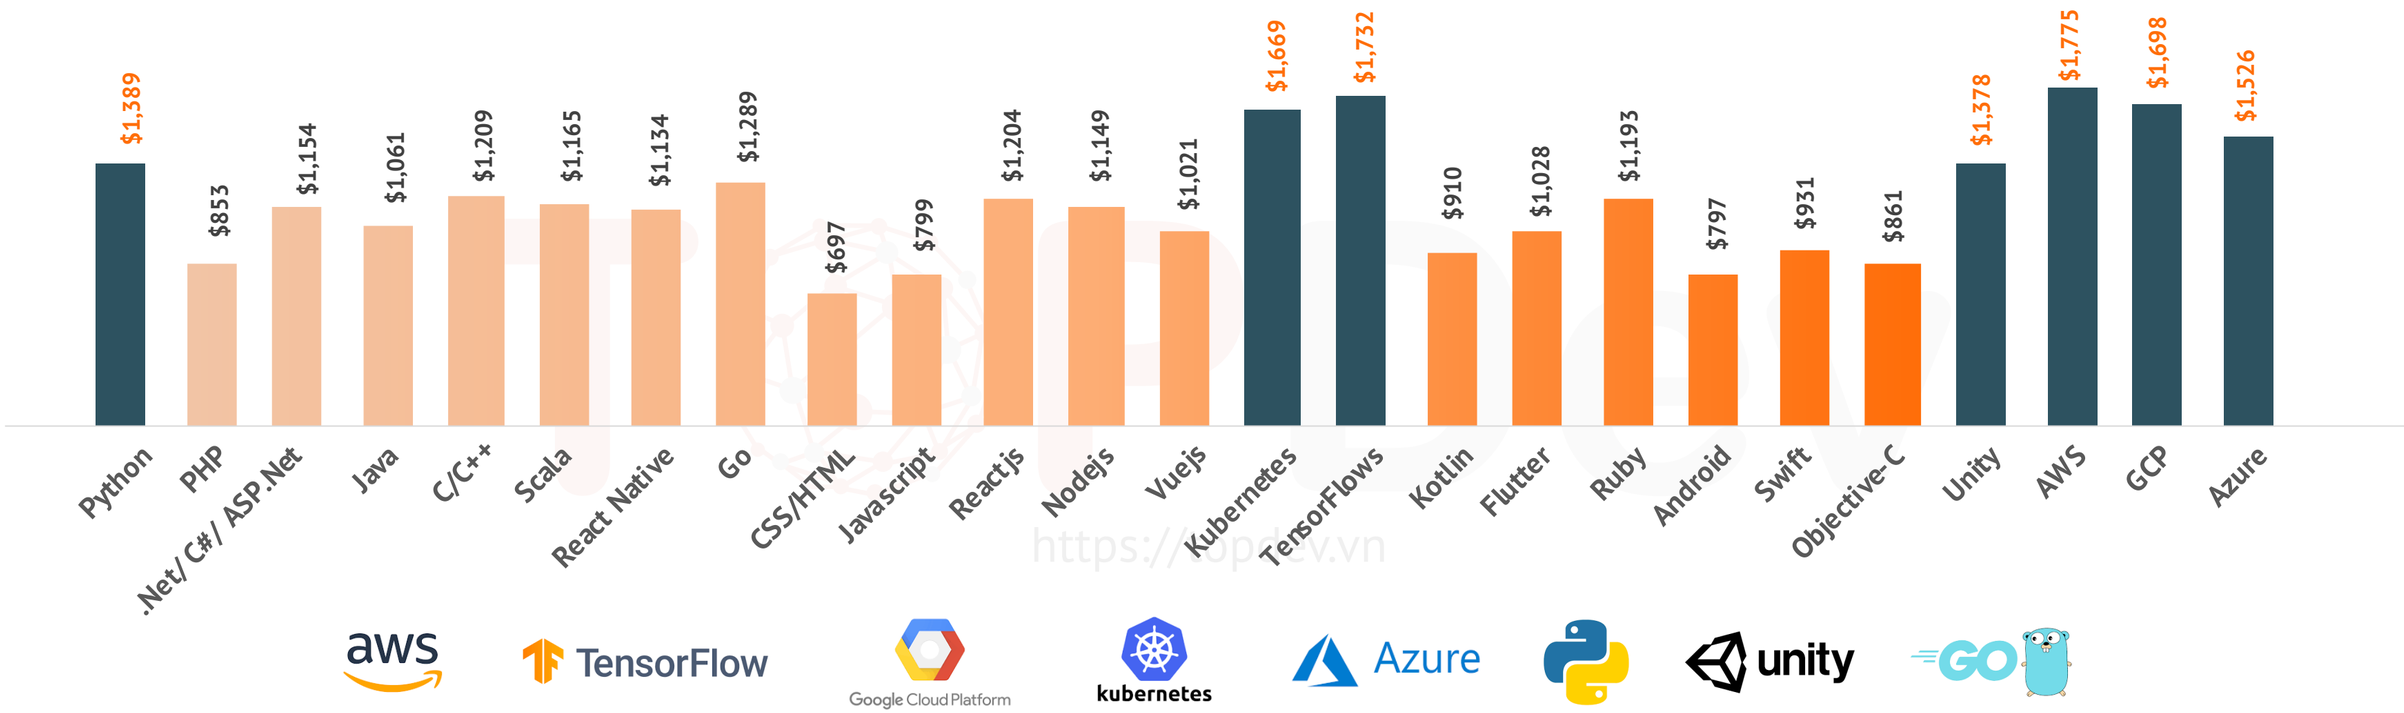

https://topdev.vn

DEVELOPER SALARY @TECHNOLOGY

DEVELOPER SALARY BY TECHNOLOGIES

(relatively up to 3 years of experience working in specific technology)

[Unit: USD]
Note: All salary data stated in this page refers to monthly gross salary before tax and excludes other benefits like overtime, bonus, etc.

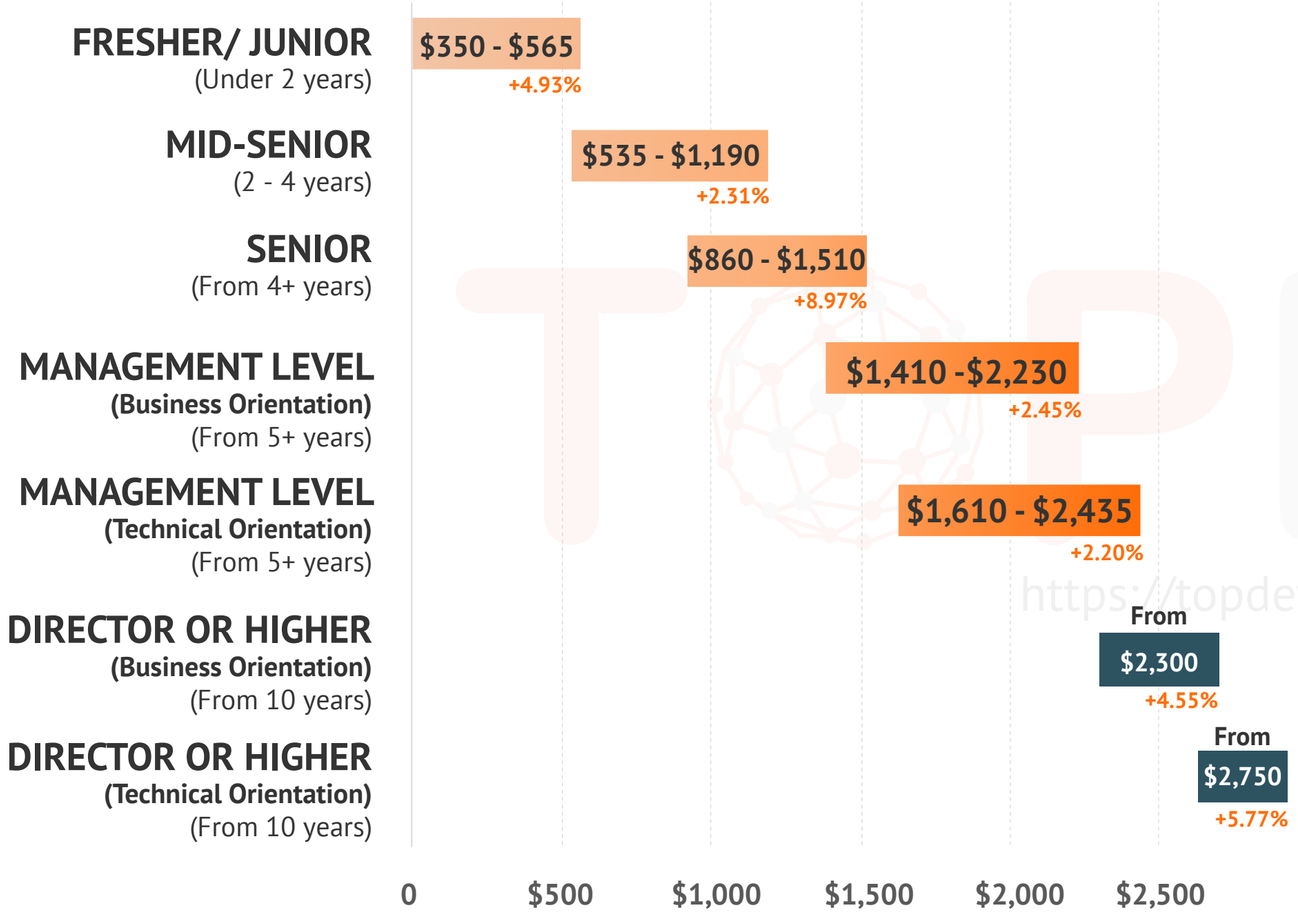

Top highest-paid tech stacks in the list can be divided into 2 big groups: High tech related to AI/ML trends (Kubernetes, TensorFlows, Python) and Cloud Computing (AWS, GCP, Azure), new comer this year is Unity with increasing trend of play-to-earn & NFTs. Worldwide digital transformation/ cryptocurrencies as well as significant impact from Covid-19 have made the numbers. Following the top list, fundamentals technologies related to web, system & mobile development still take the considerably high ranks. While there was a considerable decrease in Mobile old-fashioned skills compared to the beginning of 2010 with "mobile first" wave, new platforms for Mobile Development still claim their value with a higher salary base than other common tech stacks.

DEVELOPER SALARY @LEVEL & INDUSTRY

DEVELOPER SALARY BY YEARS OF EXPERIENCE

[Unit: USD]
Note: All salary data stated in this page refers to monthly gross salary before tax and excludes other benefits like overtime, bonus, etc.

During the first 5 years, developer salaries ranged from $350 (Fresher) to less than $1,190 for Mid-Senior. For developers from 5 years of experience, the difference in salary is mainly based on position and responsibility for business operations. Director or higher level will have a salary of at least $2,300. The salary for a technical management level will be higher than that of a business-oriented manager/ director.

DEVELOPER SALARY BY INDUSTRIES

[Unit: USD]
Note: All salary data stated in this page refers to monthly gross salary before tax and excludes other benefits like overtime, bonus, etc.

#1	NFT/ Blockchain	Starting $1,000 Up to $3,500
#2	High Tech (AI/ML/IoT)	
#3	Fintech	
#4	Security	
#5	Software Outsourcing	

Starting $800 - Up to $2,200

#6	IT Service	#11	Logistics
#7	Banking	#12	Business Service/ SAAS
#8	Telecommunication	#13	Digital/ Media
#9	PropTech	#14	Healthcare
#10	E-Commerce	#15	Edtech
		#16	BPO

The top 3 industries with high income currently are Blockchain, High Technology and Fintech. Imported into Vietnam since 2015, High-tech field (AI, IoT, Cloud computing,...) is considered as the key to bring competitive advantage, a mandatory trend until 2025. For Fintech, this is considered a really necessary industry for banks and all corporate governance systems. Despite being in the top industries with high salaries, businesses still face challenges when finding personnels for most of IT positions.

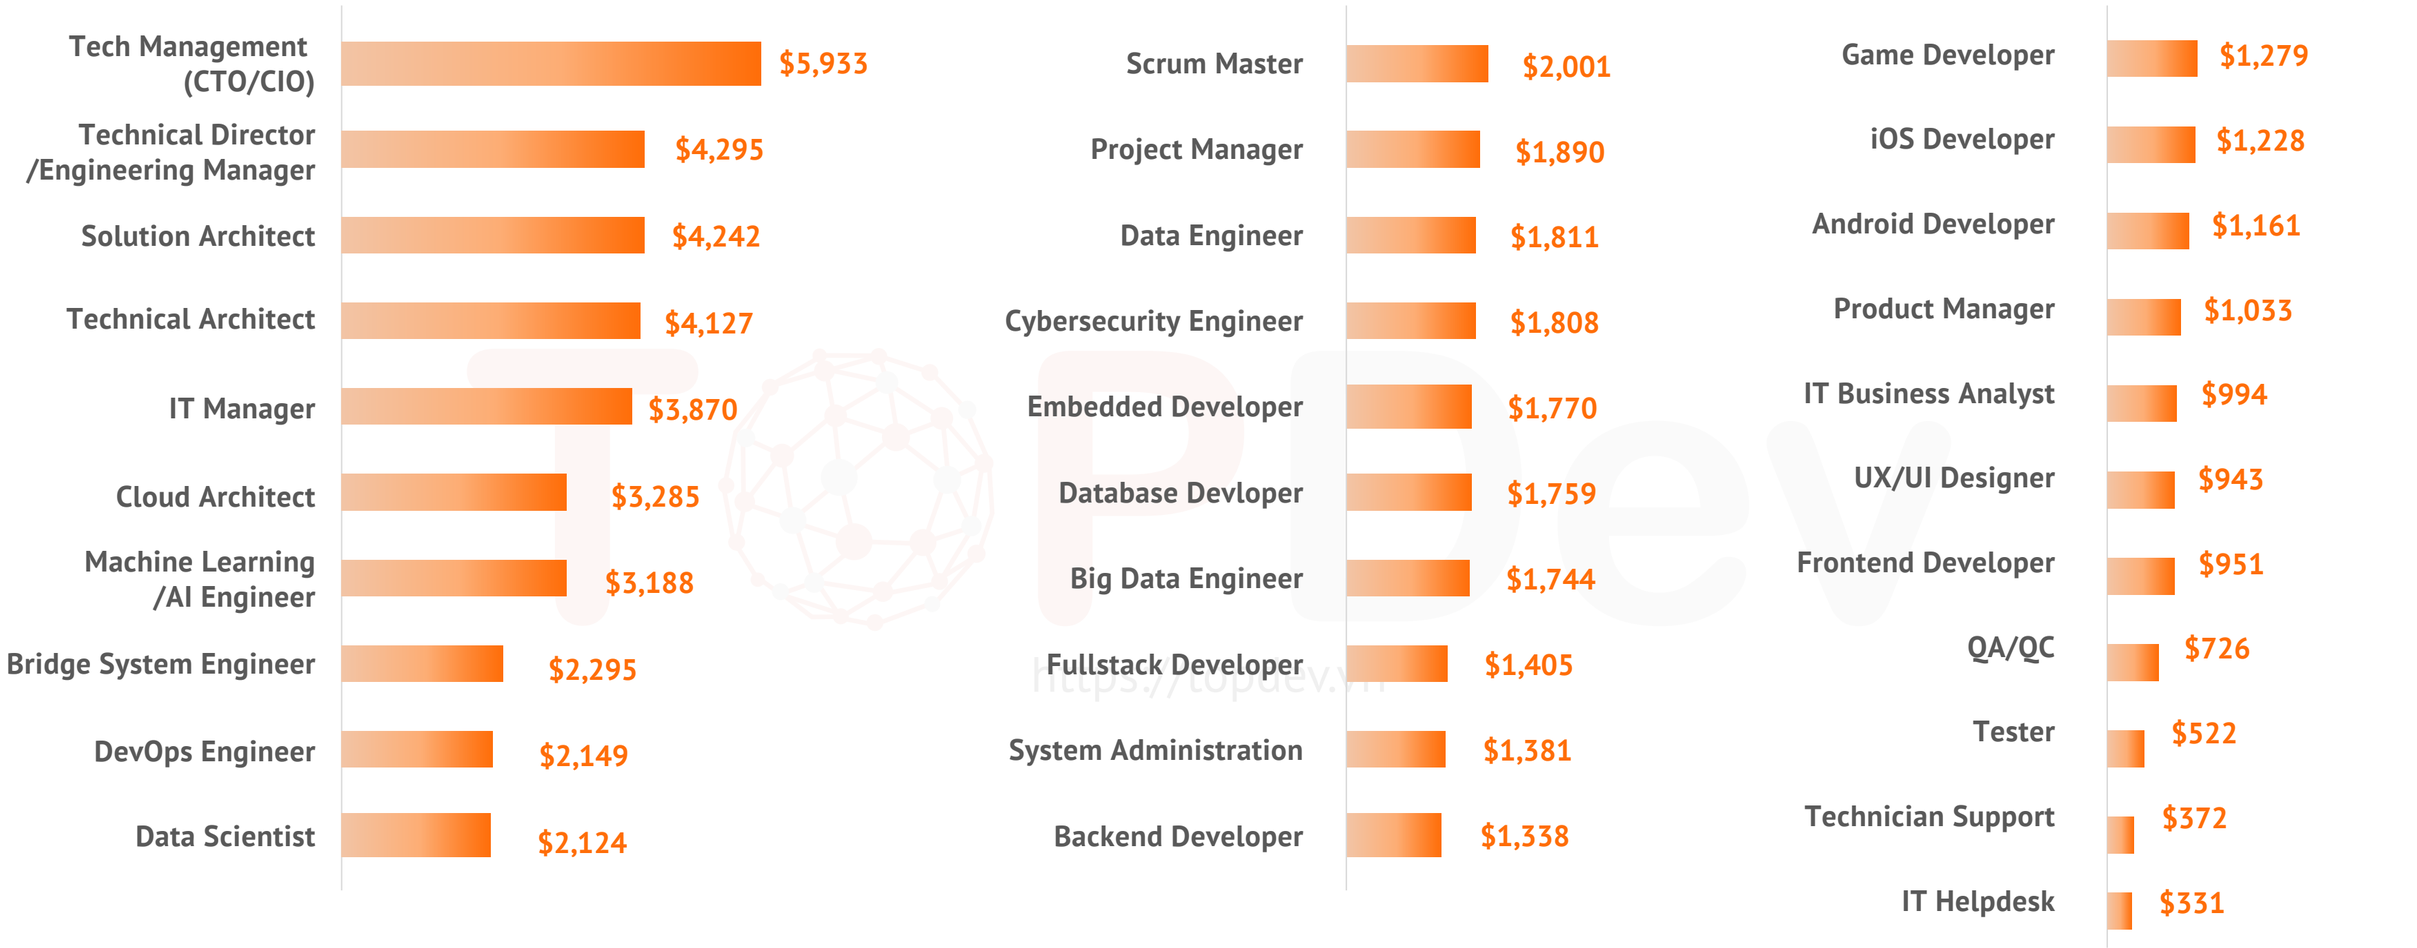

https://topdev.vn

DEVELOPER SALARY @POSITION

DEVELOPER SALARY BY POSITIONS IN IT INDUSTRY

(relatively up to 3 years of experience working in specific technology)

[Unit: USD]
Note: All salary data stated in this page refers to monthly gross salary before tax and excludes other benefits like overtime, bonus, etc.

As predicted by the previous reports, highest-paying positions require special skills like Data Analyst, Cloud, DevOps, Machine Learning or AI. Due to Covid-19 impact which leads to urge for business digital transformation, the importance of Cloud Service & DevOps has played a critical role in maintaining & developing the business. Therefore, there has experienced dramatical growth in demand for Cloud/ DevOps engineers which follow with those positions increasing the salary base.

CTO, CIO or Tech Management positions which are still considered the highest career goals with more responsibilities & adaptability to “live & work along well with pandemic”, which now is not limited anymore, ranging from people & performance management, planning & strategies, risk management, cybersecurity & scalability along with stability. To reach this, managers have to master strong basic skills, handle management tasks, optimize companies’ technology/ technology-based products & on-time adjustment. New challenge of remote management also matters.

TOP FASTEST GROWING IT JOBS IN 2022 – 2023

DATA SCIENTIST

Data scientists use technical and analytical skills to identify patterns, handle data, and draw valuable conclusions. They recognise the right solutions by combining theoretical and industry knowledge, contextual insights, and scepticism of established assumptions.
Some Data Scientist skills include: Machine Learning algorithms, creating data models, programming languages, such as Python and R, identify business issues to provide appropriate solutions.

Level 1
Fluently use basic features
$ 1,593

Level 2
Proficiently use
$ 2,124

Level 3
Master, self-build/ optimize
$ 2,443

DEVOPS ENGINEER

DevOps engineer has been named one of the most-hired roles in recent years. DevOps engineer oversees the coding, scripting and development processes. They are also in charge of the software development team involved in the deployment and network operations.
Some DevOps engineer skills include: programming languages, such as Python and R, coding and scripting, Good grasp of tools, such as Git and Jenkins, Mastery in Linux or UNIX system administration, Strong communication and interpersonal skills, Deep understanding of DevOps best practices.

Level 1
Fluently use basic features
$ 1,612

Level 2
Proficiently use
$ 2,149

Level 3
Master, self-build/ optimize
$ 2,471

CLOUD ARCHITECT

A cloud architect creates cloud architecture and cloud strategy. They also coordinate, implement, and deploy cloud services. Cloud architects ensure correct application architecture and execution on the cloud platforms.
Some of the cloud architect skills include: programming languages such as Python, Ruby, data storage fundamentals, Route 53 (DNS), CloudFront (CDN), and Virtual Private Cloud (VPC), cloud-specific patterns and technologies.

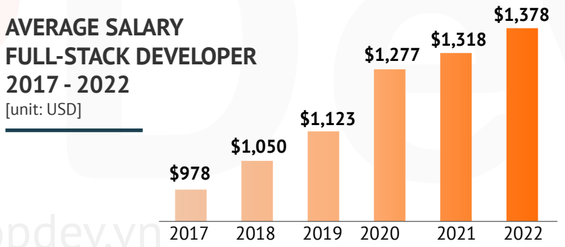

Level 1
Fluently use basic features
$ 2,074

Level 2
Proficiently use
$ 3,190

Level 3
Master, self-build/ optimize
$ 3,573

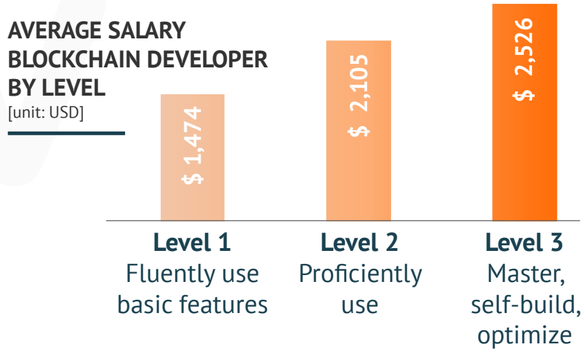

FULL-STACK DEVELOPER

A full-stack developer is in charge of developing and building APIs using various combos of stack technologies and is proficient in both front-end and back-end programming.
Some of the full-stack developer skills include: Good understanding of programming languages (MongoDB, Express.js, AngularJS, and Node.js...), Knowledge of how to design and develop an API, Understanding of web development fundamentals, Good command over database technologies.

BLOCKCHAIN DEVELOPER

A blockchain developer develops and implements blockchain-based architecture and solutions.
A blockchain developer should have strong programming abilities and a complete understanding of the technologies, such as cloud computing, security protocol stacks, crypto libraries, functions, and consensus processes. Some of blockchain developer skills include: programming languages like C++, Java, Python, JavaScript, and C#, working with codebases, Good knowledge of algorithms and data structures.

#NFT #GAME #WEB3.0 #AI/ML #CYBERSECURITY

Along with the simultaneous and rapid development of Blockchain, cryptocurrencies & nonfungible tokens (NFTs), the trends of play-to-earn, GameFi, DeFi have created massive waves of demand for recruiting game developers, blockchain developer, web3.0 developer. The fact that blockchain and DLT platforms have been going through the disillusionment bottom of the hype cycle, in some markets and sectors, is well on its way to driving real productivity and creating value. treat. In the Vietnamese market, businesses and managers need great efforts to adapt and apply these technologies to businesses as well as the entire market needs a more correct and realistic perspective.

4 TECH HIRING IN VIETNAM
PATTERNS, TRENDS & CHALLENGES

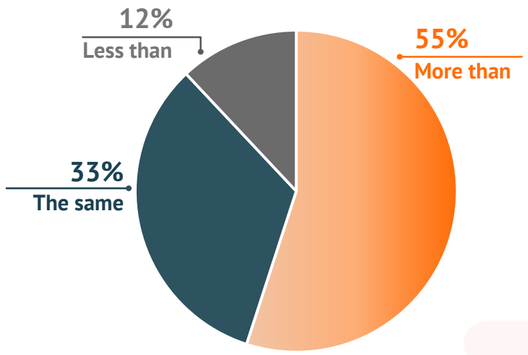

Tech hiring behaviors, concerns & challenges
Tech hiring trends in 2022 - 2024
Big challenges in HR & Key Takeaways

Vietnam IT Market Report | Tech Hiring 2022 | © TopDev All Rights Reserved

TECH HIRING IN VIETNAM #1

TECH HIRING BUDGET IMPACT IN POST-COVID PERIOD

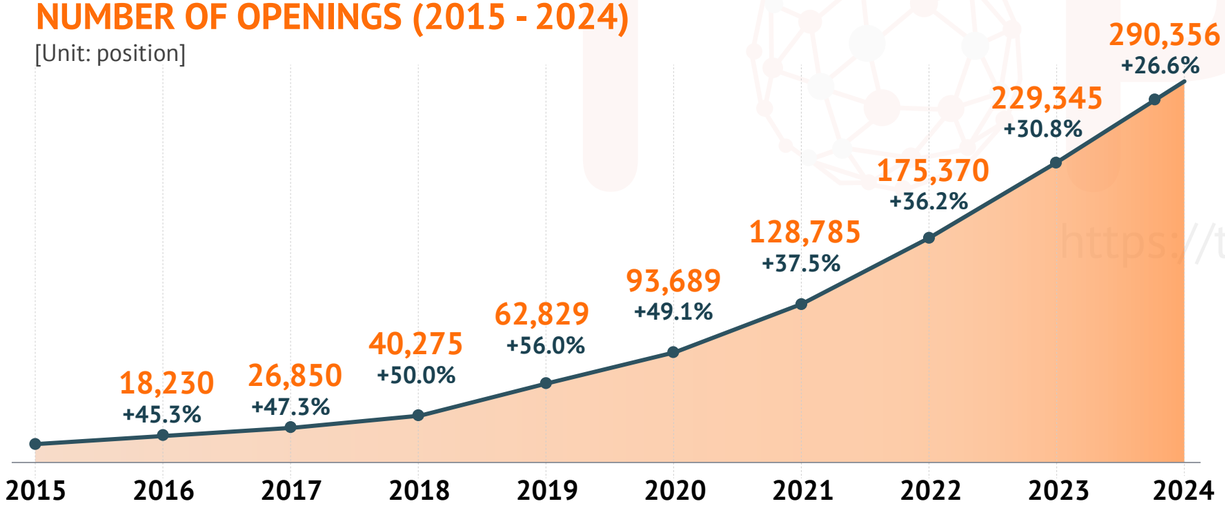

Question: How did recruitment budget for IT positions change with Covid-19 impact?

As mentioned, pandemic has been considered as hundred-year push to the country, especially digital economy. Accordingly, tech industry has risen dramatically which led to increasing demand of hiring developers for digital transformation & innovations. 55% companies had hired more developers than previous, 33% same as last year and only 12% adjusted to hire less.

NUMBER OF OPENINGS (2015 - 2024)

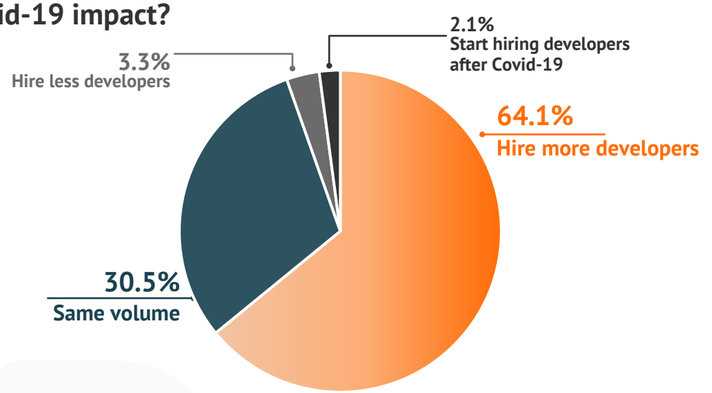

[Unit: position]

MASSIVE GROWTH - IT recruitment demand still surges until 2024. The reasons behind this upsurge demand can be listed: Vietnam has drawn enough attention to bring in IT companies in the same region to hire or construct the product development team; the creative startup wave in technology sector is becoming stronger, especially after big investments for technology startups; the transformation wave of traditional businesses in sectors like tourism, agriculture, real estate.. all shift to digital transformation and e-commerce.

TECH HIRING PLAN IMPACT IN POST-COVID PERIOD

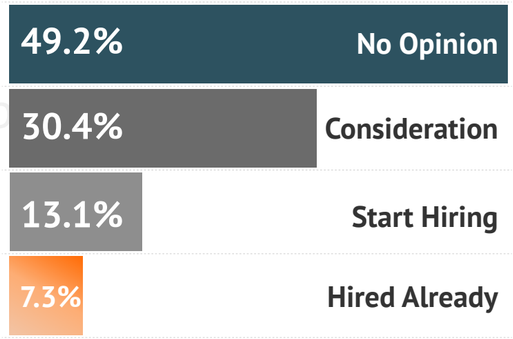

Question: Compared to previous year, how did the number of hiring positions change with Covid-19 impact?

64.1% companies decided to expand development team with more tech positions hiring. 30.5% companies keep the same pace as previous period while only 3.3% said that they had to decrease hiring developers volume.
2.1% companies in the survey have started to hire developers right after Covid-19.

% OF HIRING REMOTE/ FREELANCER

How you think about hiring remote/ freelancing developers?

More than 50% of companies have been and are considering recruiting IT personnel to work remotely or as freelancers, of which 13.1% have started recruiting & 7.3% have recruited and worked in enterprises.

TIME TO FILL A POSITION IN TECH INDUSTRY

AVERAGE
51 days

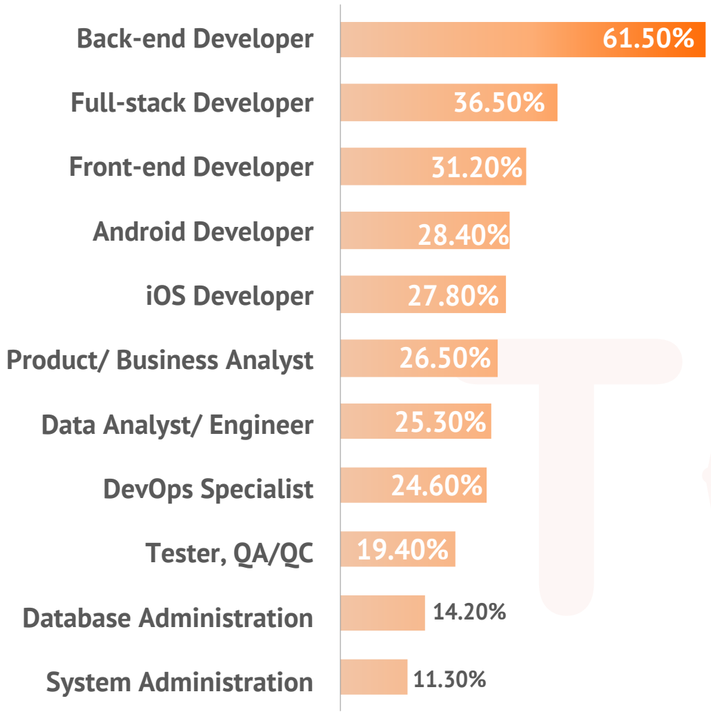

(*) Include all the process from job announcement, screening to interview & onboard.

Due to the high demand for developers, it takes a longer period to find candidates open to discuss the vacancy. Also, developers often have a couple of offers at the same time, and they may take some time to consider the best option for them.

TECH HIRING IN VIETNAM #2

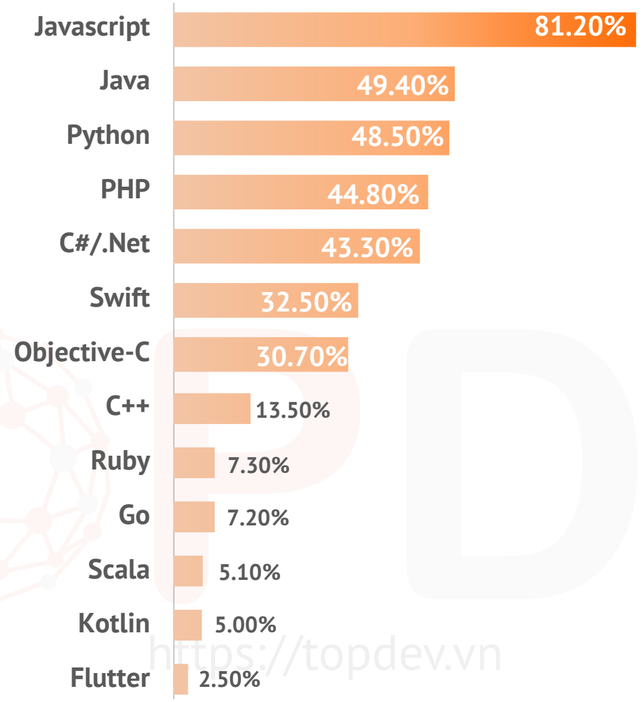

TOP HIRING TECH POSITIONS

Which positions do you hire the most? (choose up to 5)

TOP HIRING TECH STACKS/ TECHNOLOGIES

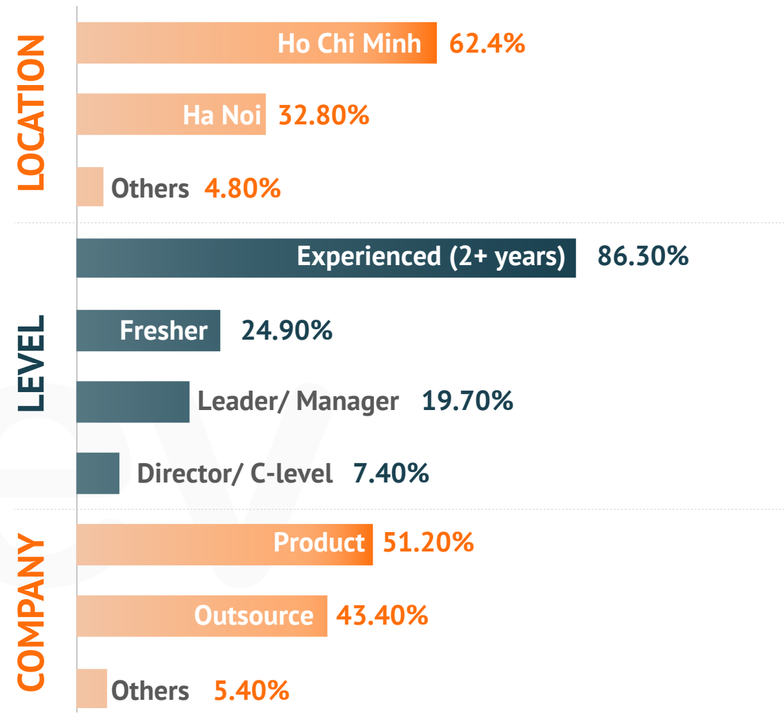

Which tech stacks of developers do you hire the most? (choose up to 5)

https://topdev.vn

TOP HIRING LEVEL / LOCATION

Which level of developers do you hire the most? (choose up to 2) | Where are most of the positions located?

More than 80% companies prioritize to hire experienced developers while only 24.9% companies are willing to hire freshers for training. In fact, there haven't been many "playgrounds/ sandbox" for tech freshers to apply their learning or start their career as easily as it is to experienced ones.

10 years ago, the IT industry has been positioned by many large outsourcing companies. However, this movement is transforming into making products and innovative services to create greater values, which let product companies start hiring more qualified developers.

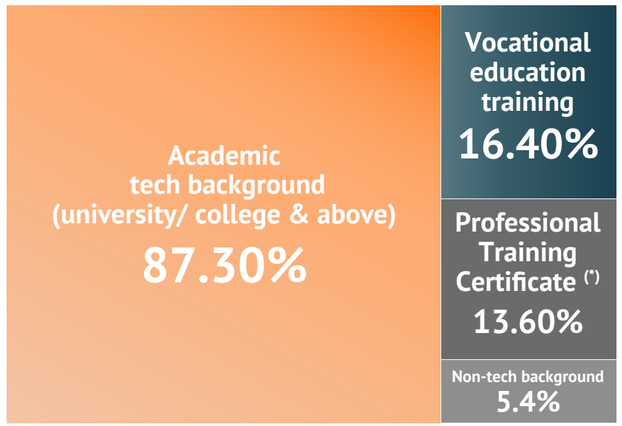

Significant trend is that companies start hiring more female developers/ IT-related positions than ever.

TOP HIRING PREFERENCE OF EDUCATION BACKGROUND

Question: Which education background from tech talents do you prefer (choose up to 2)?

Most of employers in Vietnam (87.3%) prefer tech talents with academic tech background (universities/ colleges & above). On the other side, only 5.4% employers open to hire non-tech background candidates for positions in Tech industry. Candidates completing vocational education training or obtaining professional training certificate are preferred with 16.4% & 13.6% respectively.

With modern tech hiring model, it is expected that more & more non-tech background as well as alternatives beyond academic background can have chance to join the Tech labor market without lack of recognition.

(*) Include Certificate issued by global/ local institutions, online/ offline coding/ training courses

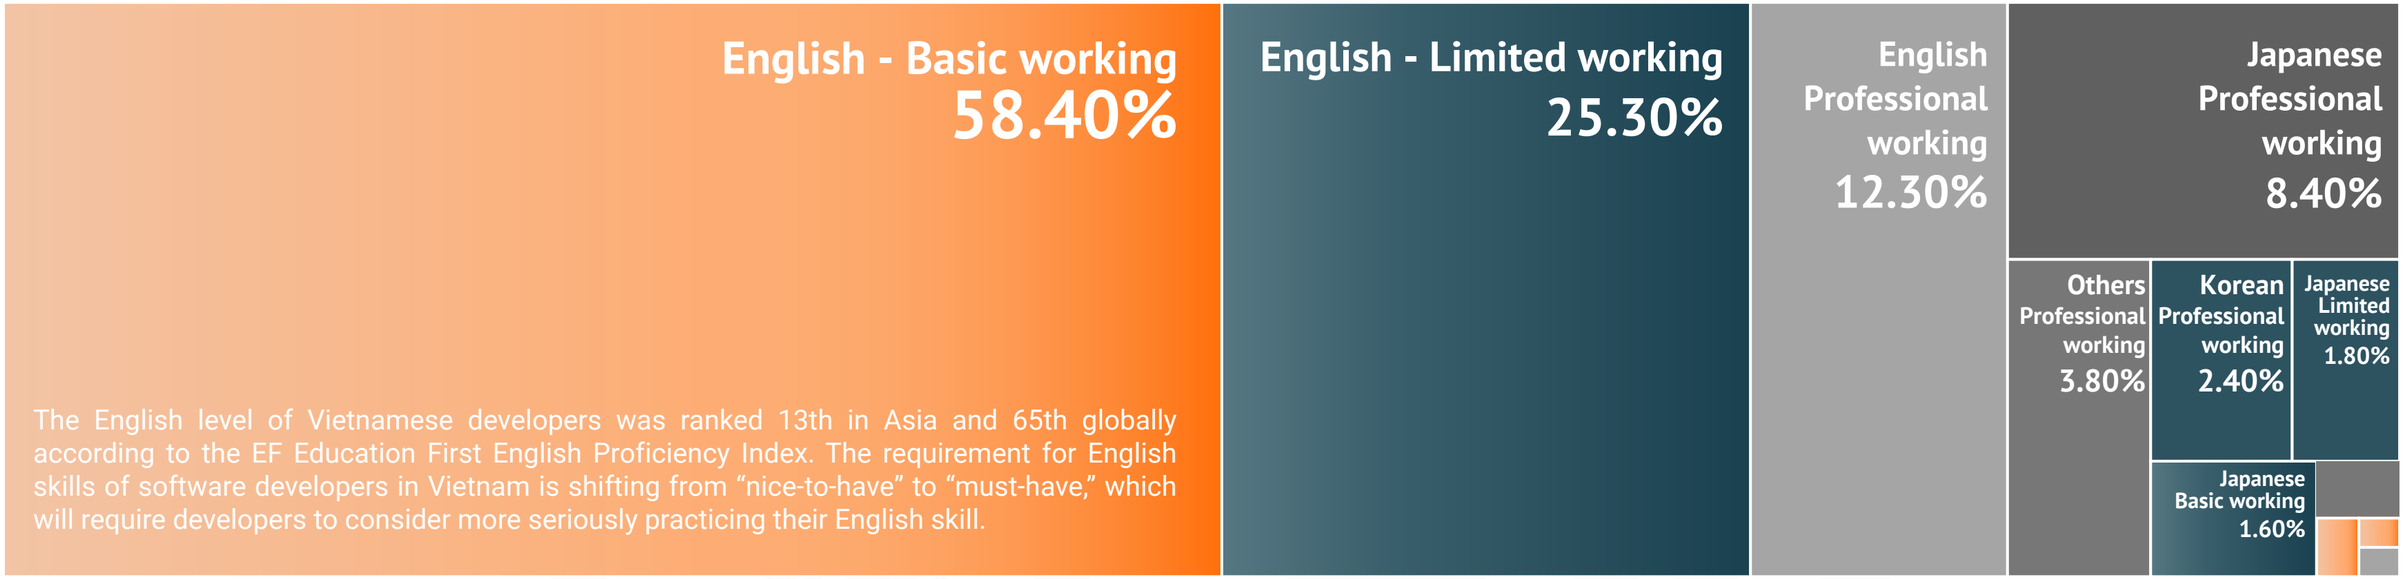

TOPDev
Top IT Jobs For Developers

TECH HIRING IN VIETNAM #3

FOREIGN LANGUAGES PREFERENCE

Question: Which foreign language & level of competence do you require the most for tech positions in your companies? (choose up to 3)

Language competency:
- Basic working: read & chat communication
- Limited working: read, chat & basic speak
- Professional working: fluent use

The English level of Vietnamese developers was ranked 13th in Asia and 65th globally according to the EF Education First English Proficiency Index. The requirement for English skills of software developers in Vietnam is shifting from “nice-to-have” to “must-have,” which will require developers to consider more seriously practicing their English skill.

Most employers (more than 80%) require developers to have at least basic & limited working level for their tech jobs. That ratio of professional working in English requirement is 12.3%, mostly from foreign companies located in Vietnam having both management levels & customers using English frequently. Apart from English, Japanese & Korean have been another 2 popular foreign languages requirement in the job descriptions recently. The hiring pattern seems much different from English-required side. Most of employers from Japan & Korea in the case hiring developers whose foreign language is a must mostly require Professional working level. Rarely do they accept Basic or Limited working level, mostly due to some particular differences in culture & communication, in which basic level may trigger some inappropriate situations. Same requirements also apply to other foreign languages like French, Chinese, Russian...

SOFTSKILL /INTERPERSONAL

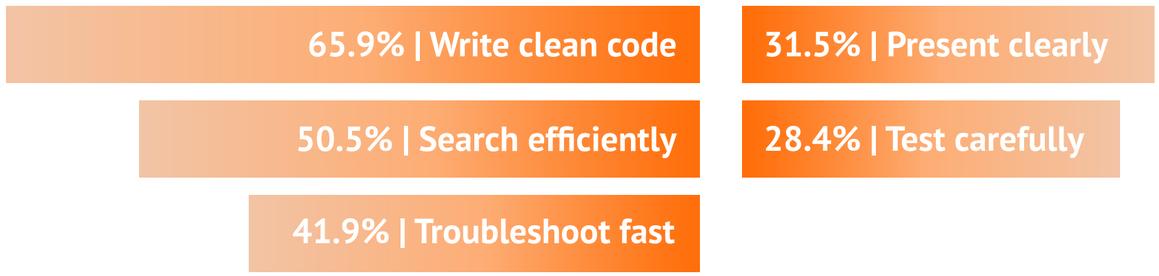

Question: Which softskills do you require the most from developers? (choose up to 3)

In addition to technical skills, soft skills have become an important criteria in the process of HR/ recruiters evaluating IT candidates.
After pandemic, the list has changed a lot: top 3 important soft skills for developers include: communication, collaboration/ teamwork skill & growth mindset.

MOST PREFERABLE NICE-TO-HAVE SKILLS

Question for Hiring Manager (mostly Technical Leader): Besides required skills, which other skills of candidates will make you more impressive?

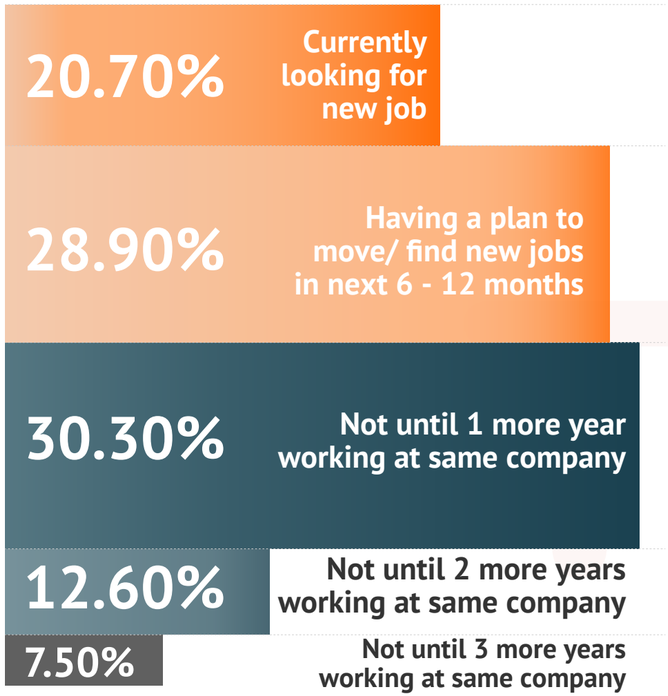

TOPDev
Top IT Jobs For Developers

 | © TopDev All Rights Reserved

IT CANDIDATE JOB SEARCH BEHAVIOR

JOB SEARCHING TIMELINE

Question: When do you think about finding a new job?

Nearly 1 in 2 developers will become active candidates in the next 12 months.

20.70% of developers are actively looking for a new job **(the highest ratio ever)**; 28.9% plan to move/ find a new job in the next 6-12 months. 30.3% of developers answered that they would spend at least 1 more year at their current company.

The rest spend 2 to more than 3 years to continue with the current company. It can be seen that more & more developers actively looking for work, which makes it more difficult for IT recruiters to retain tech talents in the companies, but in another way, it's more chance to find suitable candidates.

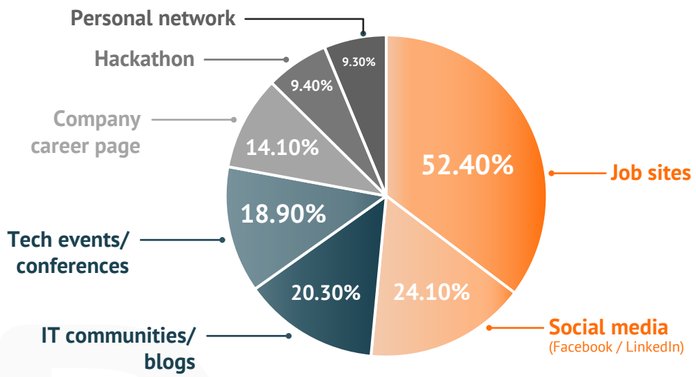

NEXT 6 MONTHS

Question: Are you planning on looking for a new opportunity in the next six months?

Fresher	Experienced	Leader/ Manager	Director/ C-level
45.8% Yes	54.2% Yes	31.5% Yes	22.9% Yes
8.5% Maybe	13.9% Maybe	9.5% Maybe	11.7% Maybe
45.7% No	31.9% No	59.0% No	65.4% No

CHANNELS OF FINDING IT JOBS

Question: Where you usually find new jobs (choose up to 2)

The results show that job sites are their preferred channels (51.42% of the answers), followed by Social media (Facebook, LinkedIn) (24.1%) then IT community/ blog (20.3%). Other source like tech events, company career page, hackathon & personal network are alternative job search channels for developers.

OPEN TO REMOTE/FREELANCING IT JOBS

Question: Are you open to find remote/ freelancing IT jobs (nationally & globally)

ESSENTIAL INFORMATION FOR JOB CONSIDERATION

Question: Which parts of information on job description should be mentioned?

Besides primary information basically shown on job description, some of other information related to company & working culture as well as development has been highlighting points for employers to stand out.

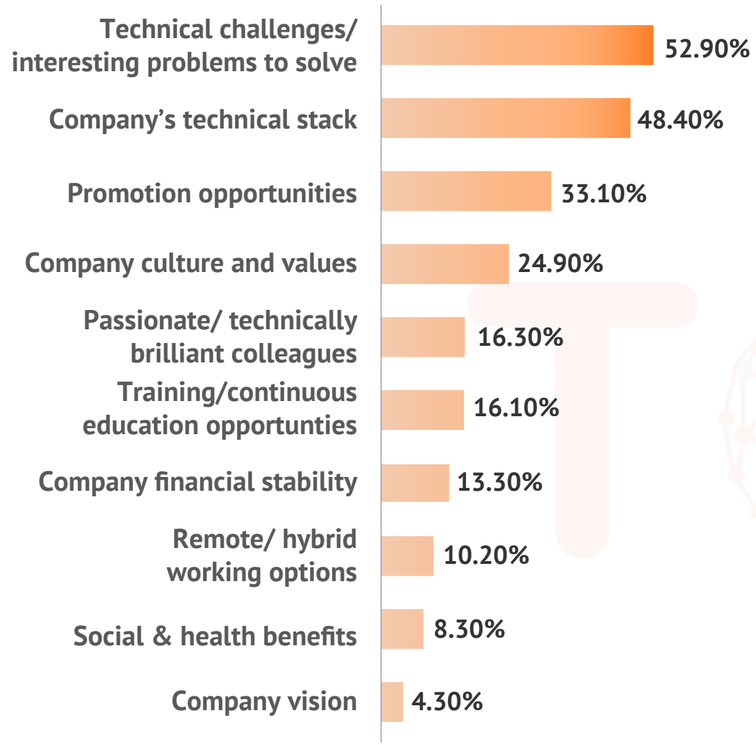

Tech stack (required programming language/ database/ methodology)	PRIMARY	SECONDARY
Company technologies (opportunity for upskill/ reskill)		**Company information** (vision, profile, location, culture, office, people)
Salary & benefit (performance review, bonus, compensation)		**Working process/ culture** (team organization, people, job description, responsibility, promotion chance)
Product/ Project information (opportunity for development/ contribution)		**Training/ Growth opportunity** (on job training, training benefit, future projects)
		Recruitment process (number of rounds, format, duration)

https://topdev.vn

IT CAREER DEVELOPMENT MOTIVATION

WHAT MATTERS MOST TO THE DEVELOPER WHEN CONSIDERING A JOB OFFER?

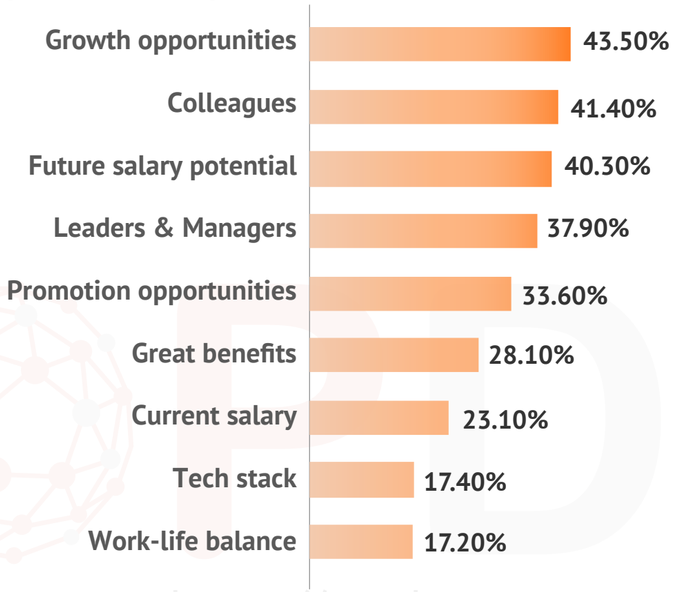

Question: Apart from salaries, choose top 3 main reasons considering a job offer

The results show that technical challenges/ interesting problems that developers will solve are the factors that motivate them to actively consider new opportunities (52.9%). Following 2nd rank (48.4%) is company's technical stack - the technologies used at the company are also a top concern for developers. Therefore, HR/recruiters need to communicate clearly about the programming language and ecosystem/ platforms used by the company with the candidates.
The third most important factor for developers is the promotion opportunities for developers (accounting for 33.1% of the answers).

REASONS FOR DEVELOPERS TO STAY AT CURRENT POSITION

Question: Choose top 3 main reasons staying current position & workplace

https://topdev.vn

Based on the answers of developers participating in the survey. The top factors that help the company retain IT talents include growth opportunities, colleagues & future salary potential.

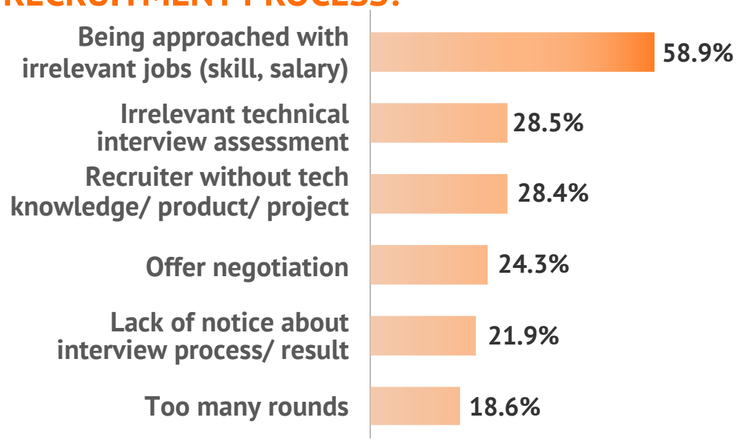

In which: 43.5% of the responses mentioned growth opportunities; followed by Colleagues with 41.4%, 40.3% is Potential Future Salary, 37.9% is Leaders & Managers & 33.6% for Promotion opportunities.

TOP REASONS DEVELOPERS REJECT JOB OFFERS

#1	Unsuitable offer (role, responsibilities & salary)
#2	Company Compensations & Benefits
#3	Lack of growth/ contribution opportunities
#4	Company reputation
#5	Not enough clarity on role & responsibilities
#6	Lack of working flexibility opportunities
#7	Undesirable tech stack
#8	Undesirable business or technical problem

Top 3 reasons why developers reject a job offer: Unsuitable offer (role, responsibilities & salary), compensations & benefits policy and lack of growth/ contribution opportunities at the company.

WHAT DO YOU DISLIKE ABOUT THE RECRUITMENT PROCESS?

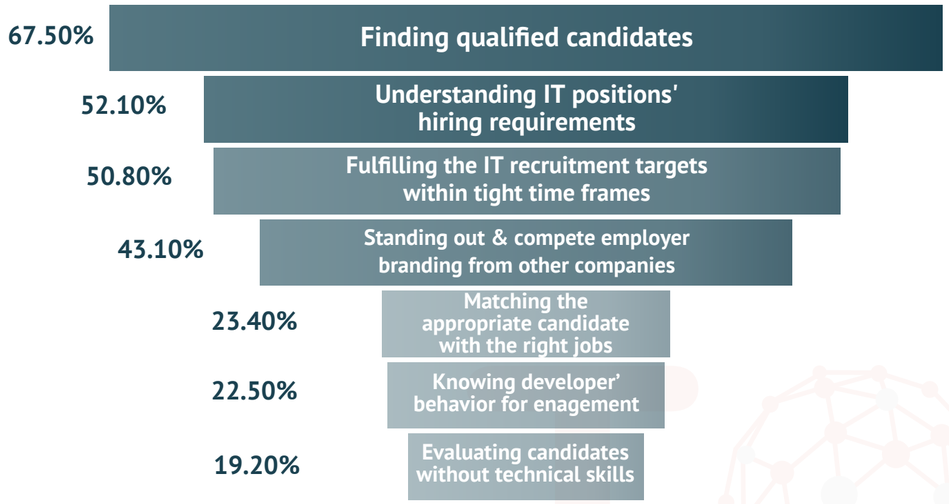

TOPDev
Top IT Jobs For Developers

 | © TopDev All Rights Reserved

HR/ RECRUITER CONCERNS

WHAT ARE MAIN CHALLENGES WHEN HIRING DEVELOPERS?

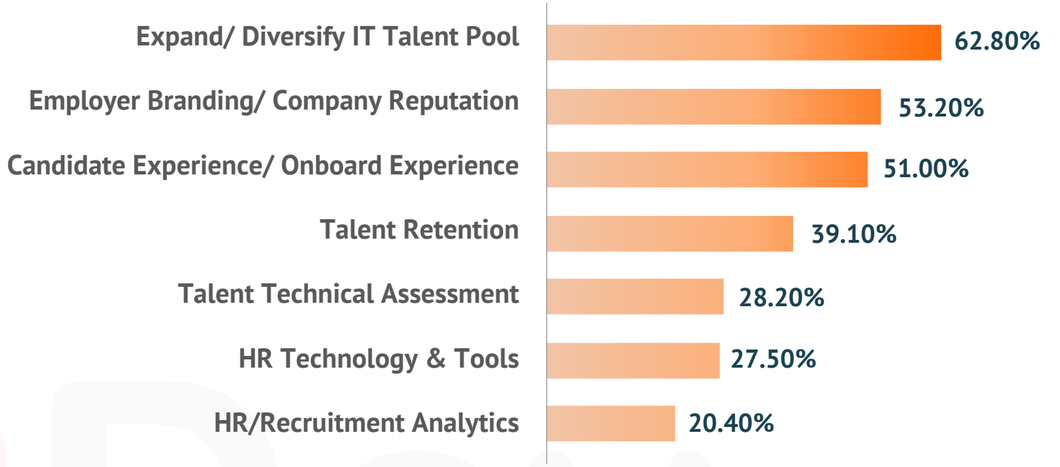

The truth is that the supply of human resources in IT field still doesn't meet the needs of demands and the expected growth rate of the industry. In 2022-2023, with new challenges of socio-economics situation & post-pandemic uncertainties, technology companies should continue to compete much harder to fill an increasing number of IT positions in a shorter time.

The HR professionals who participated in the survey mentioned most difficulties when in charge of recruiting developers. Specifically, up to 67.5% of HR/Recruiter answered that they had difficulty in "**Finding qualified candidates**" (that of 2021 was less - 61.5%), followed by **"Understanding IT positions hiring requirements**" (52.1%) and **"Fulfilling the IT recruitment targets within tight time frames"** (50.8% - much higher than last year 39.1%).

Other challenges are also mentioned such as: "Standing out & competing employer branding from other companies", "Matching the appropriate candidate with the right jobs", "Knowing developers' mindset/ behavior to engage with them" and "Evaluating candidates without technical skills".

INVESTMENT FOR TECH HIRING IN 2022 - 2023

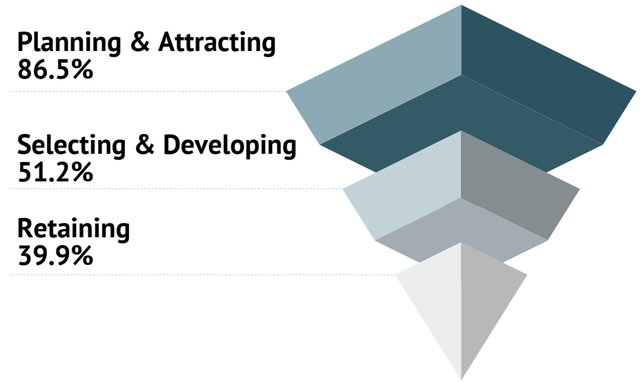

The survey results revealed that the top priority of IT HR/Recruiters in 2022 is to **Expand & diversify IT Talent Pool - 62.8%**, followed by Employer branding with Company reputation (newly added) & Candidate Experience.

In addition, some HR really focus on Talent Retention, Talent Technical Assessment, and leveraging HR technology /tools together with more hiring data analysis.

WHAT ARE TOP PRIORITY OF TECH TALENT MANAGEMENT?

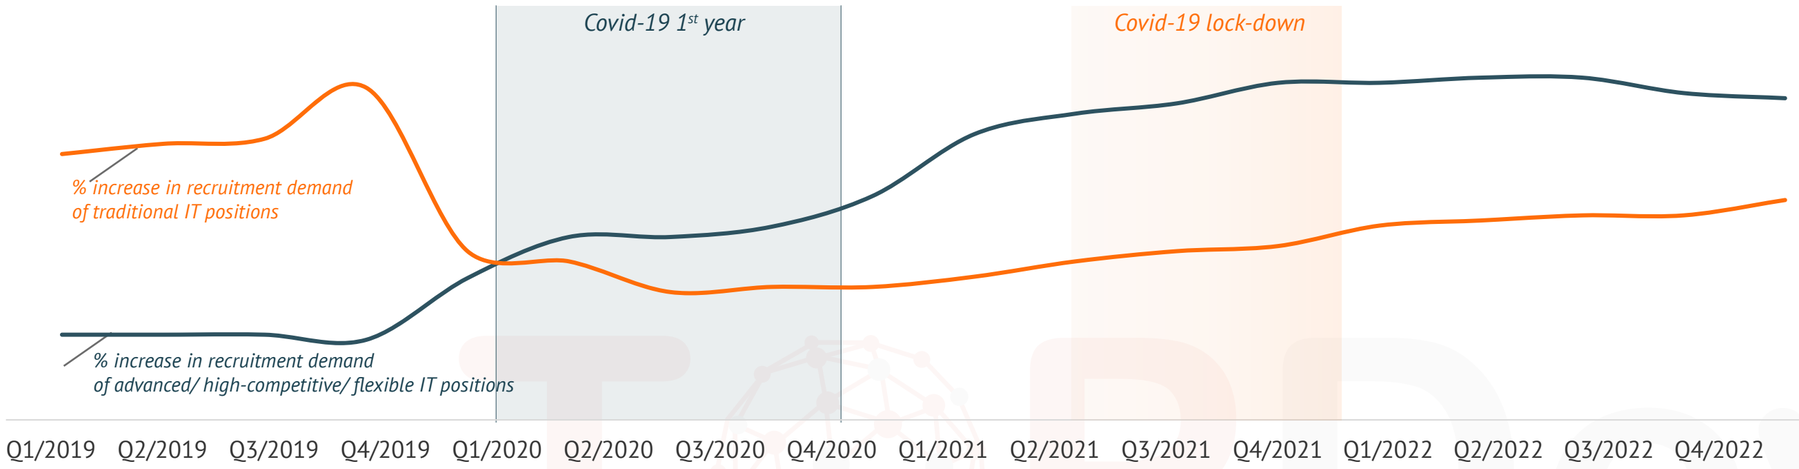

With high competition in hiring tech talents, HR/ recruiters have started to think widely about strategic plan of tech talents, ranging from Planning/ Attracting (86.5%), Selecting/ Developing (51.2%) to Retaining (39.9%).

TOPDev

BIG CHALLENGES IN IT JOBS MARKET IN 2022

IT RECRUITMENT MARKET HAS BECOME TOUGHER WITH BIG CHANGES IN REQUIREMENT, PREFERENCES IN THE CHAOS OF UNCERTAINTIES.

At the moment, the demand for IT recruitment has gradually been on the rise. Despite changes in the hiring context & social-economics situation, the IT market average salary has endured a slight impact. However, the market has undergone obvious movements and classifications in tech talents at different levels. Businesses have preferred more flexible talents with advanced ability to be ready for uncertainties in current economics. Those who were more flexible and better met businesses' new strict requirements would receive faster average salary increases than that of the market.

Political + Sociological + Technological force

#FREELANCE #REMOTE #WORK_FROM_HOME #GIG_ECONOMY

Due to the impact of Covid-19, the number of freelancers is expected to increase from 5% to 13%. Moreover, the demand for Tech hiring has also grown strongly from countries all around the world and the trend of hiring developers abroad has become popular. This leads to developers in Vietnam having more opportunities to choose and becoming somewhat more desirable in local companies's salaries & benefits. On the other hand, chance to work with foreign partners & international standards also contribute to improving the awareness and productivity of the current generation of developers in Vietnam.

- **More competition in local Tech hiring market**
- **Agile adoption to remote hiring & talent management**

Economic + Technological force

PERSONAL FINANCIAL INVESTMENT UPTREND #NFT #BLOCKCHAIN #STOCK

With the explosion of personal investment fields such as cryptocurrencies, NFT and stocks, a few individuals who are knowledgeable and quick to adapt to the trend have quickly established a solid personal finance base.

The good prospect is described as a salvation when the labor market faces many difficulties in 2021, making many people love it and start following it. **This has directly affected the labor market when a component of labor force leaves the market and pursues these new fields as a career.** However, many experts predict that it will be a very high risk in the current unpredictable situation, this option may bring an not as good result as they expect.

Economic + Sociological force

#THE_GREAT_RESIGNATION #COVID-19_BURN_OUT

There has been an ongoing paradox in human resources. That is despite **the high unemployment rate, the employee turnover rate is also extremely high** - up to 6 out of 10 people are actively looking for a new job. This paradox has been seen across many countries and now Vietnam, with the common name of **the Great Resignation - also known as the Big Quit**, an economic trend in which employees voluntarily resign from their jobs, beginning in early 2021.
Experts predicted with the prolonged effect of Covid-19, not only the "super job-hopping" group but also the standard group of employees are also prone to falling into a state of fatigue, fluctuating and they will decide to leave. Therefore, businesses need to **take care of employees' health & mental health** to overcome this difficult period, as well as limit unfortunate losses for the organization.

TECH HIRING TRENDS 2022 – 2024 IN VIETNAM #1

Along with a period of many uncertainties from the socio-economic situation as well as the labor market, the tech industry remains highly competitive when it comes to attracting talent, when it is not only local but global competition. Below are 6 main trends for HR & recruiters to follow in 2022 - 2024.

01 | TECHNICAL & PERSONALITY ASSESSMENT TOOLS

Question: Which kinds of technical assessment tests do you think are acceptable as part of the tech hiring process?

TECHNICAL ASSESSMENT FORMAT

- **Assessment test with real-life problem/ project**
- **Live/ Onsite coding interview**
- **Pair Programming Session**
- **Competitive technical contest with challenges/ games**
- **Whiteboard coding test**
- **Take-home assessment test**

PLATFORM

HackerRank, Codility, HackerEarth, TestGorilla, LeetCode, CodeSignal, DevSkiller, CodinGame

PERSONALITY TEST — **MBTI, 16Personalities, Enneagram Hexaco, DISC, Big Five...**

In order to eliminate bias in Tech hiring industry, many employees have begun to focus more on skill-based candidate assessment and it is certain that developers will benefit from this compared to other employees. the previous subjective assessment method through traditional interviews.

Personality tests are able to reveal important qualities of candidates which directly impact the culture fit, the suitability for specific positions, and team performance such as what motivates them, their thinking process, their communication preferences, and their attitudes.
1- Cultural Fit, 2- Role & Team fit, 3- Communication style & preference

TOPDev
Top IT Jobs For Developers

02 | JOB SEARCH BEHAVIOR ON MOBILE DEVICE

Companies/ Platforms should optimize performance on mobile devices via career websites, job postings, application process.

68%
JOB SEEKERS
search for jobs weekly or more on their mobile devices
48% for daily search

37%
JOB SEEKERS
at least once apply for a job on their mobile devices

84%
JOB SEEKERS
believe mobile devices will be the most common way people search for jobs within next five years or even sooner

Mobile job seekers want more than just job listings on their device:
- 60% are likely to search for jobs on their mobile device
- 54% read company reviews from employees
- 52% research information about salary

Non-mobile optimized career sites are deterring candidates:
- 1/4 job seekers are put off from applying if a company's career site is not mobile-optimized.

https://topdev.vn

03 | STANDARD DEVELOPER CV TEMPLATE FOR EVALUATION

In these modern hiring process, there is a "gatekeeper" – Applicant Tracking Systems (ATS), which serve to pre-select candidates for job positions automatically.

Less than **10 seconds** recruiter spends for looking at each CV

Automatically **70% CV** quickly eliminated by Applicant Tracking Software

Some more points to care: typo, non-professional email, irrelevant photos, social profile check...

Unlike other industries, tech industry is quite specific & particular, in which we have some standard for skill & ability to fit for a tech position. Though, there is always enough room for candidate to stand out their own personalities & expertises among others.

TECH HIRING TRENDS 2022 – 2024 IN VIETNAM #2

04 | CANDIDATE EXPERIENCE

Negative reviews about your hiring process and candidate experience will adversely affect your employer brand.

47% candidates have not applied for a job because the employer's process was "too lengthy or complicated *(SmartRecruiters)*

83% candidates say a negative interview experience can change their mind about a role or company they once liked *(LinkedIn)*

65% candidates say that a bad interview experience makes them lose interest in the job *(LinkedIn)*

86% candidates believe employers should treat candidates with the same respect as current employees *(CareerBuilder)*

A **positive candidate experience** makes candidates **38%** more likely to accept a job offer.

Companies investing a **positive candidate experience** report a **70%** improvement in hiring quality.

Build up clear candidate experience journey with involvement of all related departments

Application Process

- ✓ Write clear job descriptions
- ✓ Make the application process easy and accessible
- ✓ Build transparency into every step of the interview process

Candidate Communication

- ✓ Treat candidate with respect & proper communication
- ✓ Give candidates your full attention during interview/ call
- ✓ Be open to giving (and receiving) feedback every touchpoint

05 | SOCIAL HIRING

Social hiring is the process of advertising jobs, recruiting candidates and connecting with potential candidates through social media platforms.

As of 2022, up to 76% of the population in Vietnam uses social networks. Embracing this trend, recruiters have quickly implemented plans to reach candidates through social media channels: Facebook, LinkedIn and recently Tiktok.

BUILD
- Company profile & content strategy
- Use the appropriate social media platforms

ENGAGE
- Highlight your company culture
- Video branding
- Expand & improve your audience

MONITOR
- Tones/ vibes, company image
- Effectiveness & brand issues

TopDev

06 | EMPLOYER BRAND

Everything is employer branding. The most important employer branding insight is that it's not limited to your campaigns. Today, everything you do and say is employer branding. And more importantly, what everyone else says about you!

"*In a tight job market, with no end in sight, employers will need to brand themselves as a great place to work, too. Brand recognition has risen to a top priority for companies in 2021. In 2022, businesses will need to effectively communicate benefits, perks, and most importantly, culture to attract talent and stay viable.*" — *Forbes*

In 2022, employer branding will be more important than ever before. A new generation in the workplace, a world scarred by the pandemic, and high demand for transparency will change the way companies attract new talent. And it's good base to start internally then promote it outside.

Tip #1 - Improve your employee experience

Create an effective & engaging onboarding experience + Provide decent support for their physical & mental health + Create thoughtful bonding activities & communication + Encourage employees to develop skills (reskill / upskill)

Tip #2 - Share your story

Materials / Content Suggestion

How tech team work? How/ Why we do that?
Leaders' interview What we do?
Short video & interview format can be good to produce & share.

Channels

Social media Webinar/ Event
Company page Advertisement
Tech community Email

Tip #3 - Align your employer brand message with your company's mission

Tip #4 - Build a tech employer branding strategy

Keep update tech news & trends + Understand the insight & expectation of tech talents + Understand the insight & needs of tech & tech hiring industry

Last but not least, often monitor, response reviews related to brand/ employer brand issues & let marketing teams be involved to support your strategies. And, be honest & authentic.

BIG PICTURE FOR HUMAN RESOURCES IN GENERAL

GEN Z
THE FUTURE OF WORKPLACE

By 2025, Generation Z is expected to make up 30% of the labor force in Vietnam.

Generation Z (Gen Z) refers to the generation born from 1997 to 2012. The oldest members of Gen Z are **starting their post-education years, with new careers** and, possibly, families; the youngest are 10.

@Characteristics • **DIGITAL NATIVES** • **TECH-SAVVY** • **VALUE HUMAN CONNECTION**

GenZ @Workplace

Gen Z cares most about work-life balance and personal well-being. Income and brand reputation is the least important.

AS A LEADER

As a leader, you need to **re-design your workplace to enable this generation to succeed** because of their unique experiences. Growing up alongside the **rise of social media and entering the workplace during a global pandemic,** this generation is shaped to fight back against the traditional workplace - a workplace that originally hasn't been designed for them.

TO ATTRACT

1. Re-design entry-level work
2. Take care your **online presence**
3. Design hiring process to enable them to **show their personality**
4. Emphasize stability & **growth opportunities**
5. Focus on **flexibility & independence**
6. Be **real**, be honest, and be present

TO RETAIN

1. **Respect** them, embrace differences
2. Offer **flexibility** & support on healthy **work-life balance**
3. **Align** working purpose with company mission & value
4. **Show that you care**
5. Invest in professional & personal **development**
6. Strong management & **leadership**

TO GROW TOGETHER

1. **Leverage the expertise** of Gen X, Gen Y, and Boomers to help **mentor** Gen Z into strong leaders
2. **Nurture the entrepreneur** in them
3. **Resonate** company vision, mission and values with personal goals
4. Transparent, open & straightforward

https://topdev.vn

Way to manage

MULTI-GENERATIONAL WORKFORCE

Leverage the generation gaps & ensure business substainability

CHALLENGES

1. **Communication issues**
   Different preferred styles & tone
2. **Negative stereotypes**
   Lead to toxic culture & inequality
3. **Varying employee expectations**
   Different compensation & recognition

CONCEPT

As-is **Business-centric**
└ Lead the business
People come along for the ride

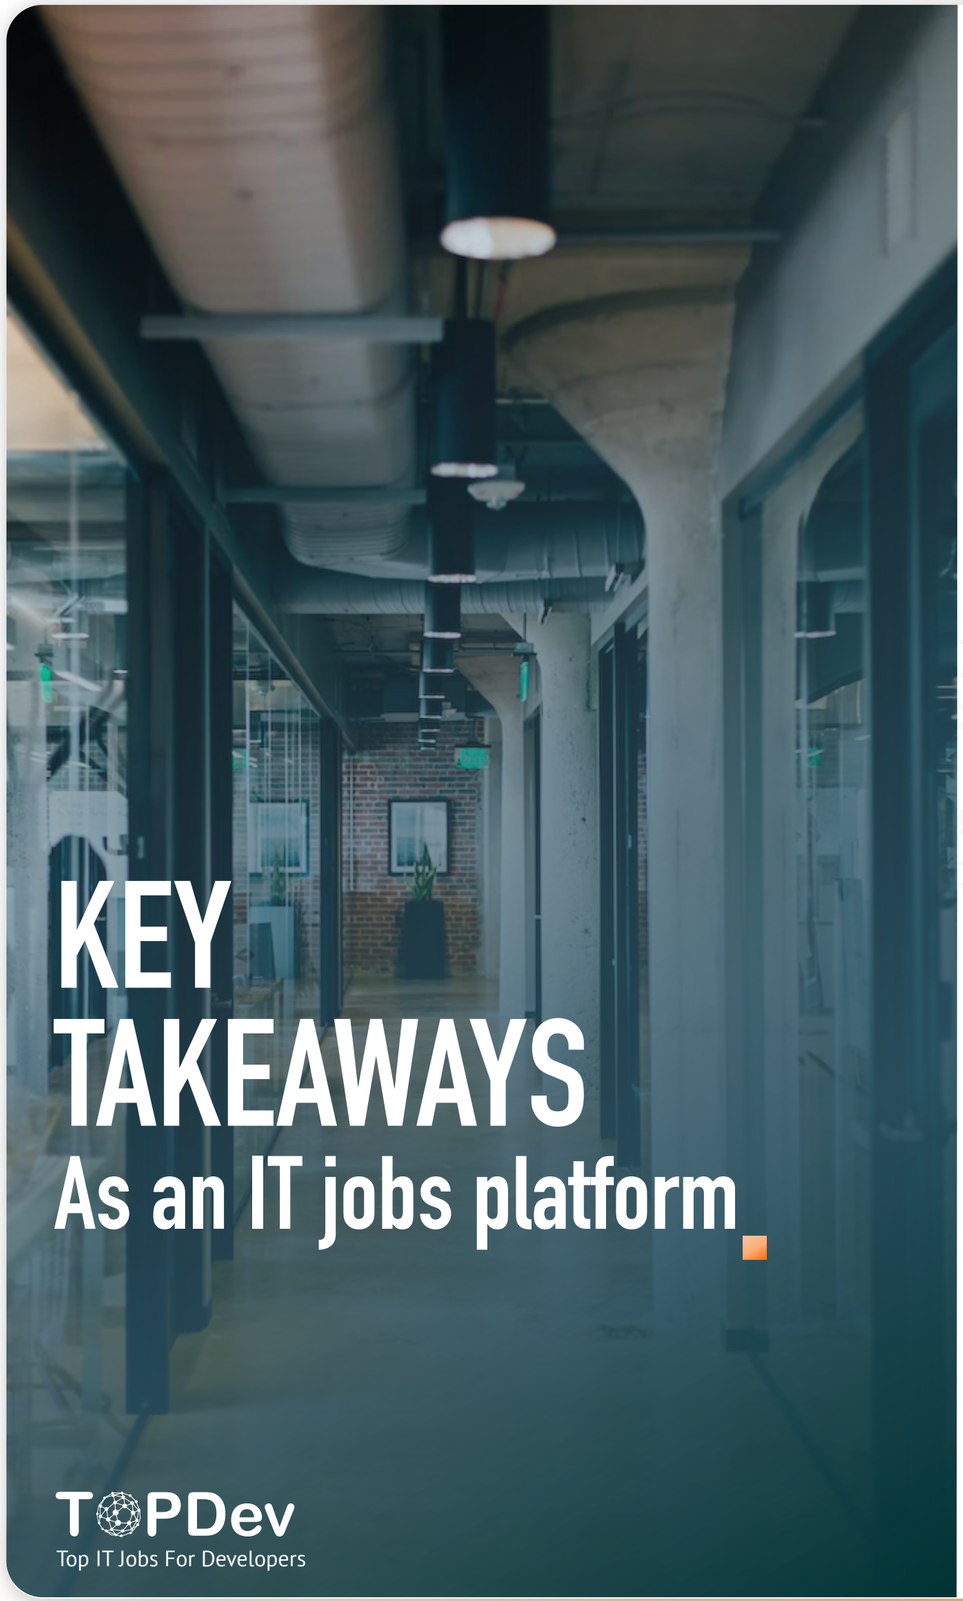

To-be **People-centric**
└ Lead the people
They drive the business forward

METHOD

1. **Argue harmful stereotypes**
   Believe in fact & data
   Put trust in people
2. **Communicate openly**
   To understand each other
3. **Respect boundaries**
   Be humanity & humility

METHODOLOGY
TopDev conducted a survey & research to find out more about developers' demographic, skills, work experience and job search behaviour as well as IT Recruitment Market in Vietnam. A total of 56,878 people took part in survey and more than 100,000 IT jobs data analyzed separately from July 2021 to June 2022 via TopDev & partners ecosystem, in which 10.9% data were invalid & removed due to irrelevant experience or low credibility in the IT industry.
Data was anonymised in accordance with GDPR guidelines and is stored separately and only used for reports analysis. Percentages may not always add to 100% due to multiple choices & different responding behavior.
All salary data stated in this report refers to monthly gross salary before tax and excludes other benefits like overtime, bonus, 13th bonus, performance bonus, sign-on bonus, etc.
